

Parents...please help us by completing our

Technology Survey

The district is working with BrightBytes...

...an educational data company, to learn more about technology use in the district. We're surveying students in grades 3-12 and their parents, teachers, and administrators.

Your participation is essential...

...to help us understand how technology is being used in our schools and community and how we can improve. Please know that all your responses will remain anonymous. You may use a computer, laptop, smart phone, or tablet to complete the survey. It should take about ten minutes.

Please use the appropriate link below.*

If you have more than one child in our schools, please choose the link for the school your oldest child attends.
