Directory updated August 2018	

Introduction

This technology plan was initially developed by the District Technology Committee using the DistrictViSTA process. This plan is intended to be an ever-evolving document that guides our efforts to provide our students, staff, parents, and community with access to appropriate technologies as we work to prepare all learners for future challenges and opportunities.

This plan represents the “baseline” approach we intend to take. Should this not meet the needs of your department, office, or classroom, be sure to contact the computer coordinator and provide documentation of your unique needs. All who read this plan are encouraged to provide feedback to the committee so the plan can continue to improve.

This plan is designed to support the mission and beliefs of our district while recognizing our current and projected environment. The overall approach of the plan is described in the Summary. Twelve subsequent sections (A through L) describe our strategy and detailed intentions for student outcomes, staff development, access to technology, policies, personnel, communication, funding, implementation, and assessment.

Technology planning is a process, not just an event. Therefore, this book is a “living document” which will be continuously updated as our plans mature, our understanding grows, and technology capabilities expand. The district is now in the process of working to refine, fund, and implement this plan. The Technology Plan was most recently reviewed and approved by the Board of Education on June 22, 2017.

District Mission Beliefs

DISTRICT MISSION STATEMENT

Mission: Explore, Empower, Excel

We *explore* through local and global opportunities, a culture of innovation, and individual learning paths.

We *empower* each other by rising to challenges, celebrating success, and learning from failure.

We *excel* as a result of our passion for learning, the quality of our character, and the strength of our relationships.

The role of technology is to support this mission in harmony with our district vision about teaching & learning and our learning standards. These and other aspects of our pedagogy have been defined and are included in this preface to our plan to ensure we keep them in proper perspective and keep our focus on teaching and learning.

ATTACHED DOCUMENTS

(such as district vision, beliefs, etc.)

District Vision Statement

Our Vision

- Horseheads Central School District sets the standard of educational excellence by fostering innovative thinking, curiosity, and a passion for learning to maximize the potential of each individual. We engage with our local and global communities to provide a student-centered, nurturing environment.
- Instructional technology will be viewed as a fundamental tool to support the growth of each student on their learning path. These tools will be equitable and sustained. They will be tied to planning regarding current and future capital projects and the District 2030 "Building Our Future Now" initiative dedicated to improving our educational program and physical infrastructure.

Overall Technology Strategy

The Common Core Learning Standards, 21st Century Learning Fluencies, and ISTE Standards require students to develop the knowledge and skills they will need to learn, work, and communicate successfully in the world of work. We must view information and communication technologies as a fundamental tool of education and commit to providing adequate, sustained, equitable access to carefully selected equipment. Our approach will support the District 2030 “Building Our New Future Now” initiative, including changes to curriculum and associated staff development and will integrate into everyday teaching and learning.

S tudent Outcomes

To accomplish our Student Technology Outcomes, we will need to align, and modify as needed, the current District Technology Benchmarks to better support the changes in teaching and assessing that will result from embracing the District 2030 “Building Our New Future Now” initiative. The Benchmarks will be integrated into all curricular areas at all grade levels. Ideally, they will support all given standards: The Common Core Learning Standards, 21st Century Learning Fluencies, and ISTE Standards. A system will be established for the regular review of District Assessments, the results of which will be used to refine instruction and technology integration.

S taff Development

All staff will make extensive use of technology resources and training opportunities. We will improve communication and dissemination of staff development opportunities and resources in order to accomplish this. Staff development initiatives will support ongoing changes to district curriculum.

A ssessment

We will know we have accomplished our plan when multiple local assessments are regularly completed online across the spectrum of grades and disciplines. Teachers and students will be provided opportunities to provide feedback on their proficiencies as well as overall technical performance. We will continue to develop and implement several specific technology assessment tools.

Technology Future Map

Section of Plan	Present (Present State & Trends)	Vision (Preferred Future)
STUDENT OUTCOMES		
A	<p>Benchmarks need to be updated to reflect the International Society for Technology in Education Standards (2016 ISTE), Common Core Learning Standards (CCLS), 21st Century Learning Outcomes, and District Curriculum. There continues to be inconsistency with implementation of and familiarity with the Benchmarks.</p>	<p>Benchmarks are updated to reflect ISTE, CCLS, and 21st Century Learning Fluencies. District assessments are aligned with the Benchmarks and assessment rubrics are designed to reflect integration of the Benchmarks. Benchmarks are aligned with Curriculum Committee work thru the 2030 "Building Our Future Now" initiative. Appropriate technology is made available to support the integration of all curriculum updates in support of the 2030 initiative. Utilize current and new committee structures to communicate and disseminate information.</p>
STAFF DEVELOPMENT		
B	<p>While many technology staff development opportunities are available, not all staff take advantage of the opportunities that exist.</p>	<p>All staff make extensive use of technology and instructional support resources and participate in training opportunities. Align Staff Development efforts with District 2030 "Building Our Future Now" initiative and resulting curriculum changes.</p>
WORKSTATION ACCESS		
C	<p>Computers are added and/or replaced at an average annual rate of approx. 15%. The original goal has been 20% per year. The compromise is a realistic balance between replacement, new technology, and fiscal reductions. Replacement is tied to physical changes and industry and instructional trends (IE: software, performance, excessive breakage, new technology).</p>	<p>All staff have appropriate technology to implement the Technology Plan.</p>
PERIPHERAL ACCESS		
D	<p>Current funding strategy allows for the purchase of most requested peripherals with the exception of the interactive white boards, which are in nearly all classrooms. Replacements are available for failed equipment. Training is available when requested.</p>	<p>Meet all students' and staff members' needs in a timely way with regard to provisioning, training, support, and convenient access to peripheral devices. Effective and efficient copier and printer management is sustained. Be in support of needs generated through the District 2030 "Building Our Future Now" initiative.</p>

Technology Future Map

Section of Plan	Strategy (Strategy for Change)	Action (Key Objectives)	Target Date:
STUDENT OUTCOMES			
A	Refine district assessments to support the District 2030 "Building Our Future Now" process and include the updated technology benchmarks. Ensure all grade levels review.	Continue to be integral in the district process of change and ensure the inclusion of technology benchmarks and technology integration in all levels of teaching.	Ongoing
STAFF DEVELOPMENT			
B	Improve communication and dissemination of staff development opportunities and resources including home-grown in-services and outside resources. Investigate use of online in-service options with the In-service committee.	Provide training opportunities for all staff. Customize training wherever possible. Critically explore additional online staff development models.	Ongoing
WORKSTATION ACCESS			
C	Critically analyze replacement and new requests each year with regard to need. Consider new mobile technology over traditional desktop technology. Cascade older equipment for re-use or replacement as needed.	Refine implementation of new and replacement technology using request form, frequent review of usage data, classroom visitation, and budget accountability.	Ongoing
PERIPHERAL ACCESS			
D	Continue to analyze needs annually from an obsolescence and provision basis in each building. Research ways to replace interactive whiteboards with new panel/monitor technology through sources such as SMART bond, capital projects, or other non-traditional funding. Cost efficiencies and aid generation are a priority.	Refine implementation of new and replacement technology using request form, frequent review of usage data, classroom visitation, and budget accountability.	Ongoing

Technology Future Map

Section of Plan	Present (Present State & Trends)	Vision (Preferred Future)
SOFTWARE & DATA ACCESS		
E	Convenient access to core applications is available in pertinent locations. A broad variety of software packages are installed on computers. When appropriate, standardized software is purchased and deployed. Information about existing software, relative to standardization, is shared electronically. Nearly all applications are web based.	Product information is shared efficiently. Web-based software and data access options should be explored due to their availability both remotely and from schools. State & District auditors recommendations relative to HIPAA, FERPA, & Parents Bill Of Rights should be included. Remote access to District managed resources includes security planning with strict adherence to NYS Schedule 2-d law. Benchmark, CCLS, 21st Century Standards, and ISTE Standards are routinely considered in purchasing decisions.
CONNECTIVITY		
F	There is network in every classroom, office, and meeting area. The network is leveraged to provide access for data, phone, CATV, and video. Special distance learning connectivity is available in two District multimedia rooms. All district infrastructure will be upgraded by Summer 2019.	Fast, reliable, secure access from all locations to needed applications. Convergence of most technologies onto the "network" - wired & wireless computer access, phone, HVAC, security, camera, CATV, video, video conference, and live on-site broadcast. Ability to support any feasible number of devices, to include 1:1 or higher ratios with students and the possibility of personally owned computing devices. Support all hi-density device initiatives, including CBT and online assessment.
POLICY		
G	Recently revised Board of Education policies, regulations, and exhibits are currently posted on the District's Intranet and through the electronic online Board of Education system, BoardDocs. Most, but not all, policies and regulations are reviewed on an annual basis.	Technology policies are reviewed on an annual basis. Emphasis is given to those policies regarding the safekeeping of "sensitive" student and staff data, particularly "sensitive" data residing at vendor sites. Any changes are communicated to all staff. Recommendations from Auditors are taken into account.
SUPPORT		
H	9 Staff, 7.3 FTE - Technology Director (Reporting to Assistant Superintendent), Instructional Technology Support Specialists (District and BOCES), Network Technicians (BOCES). Access to many other regional services (BOCES).	A support structure will exist that can meet the instructional and technical needs of all users in a timely manner.
COMMUNICATION & COOPERATION		
I	There is a wide range of avenues for communication. We cooperate with a wide variety of organizations. Concerted effort is made to keep communications up-to-date.	We communicate regularly with all stakeholders. Appropriate technology is utilized to facilitate communication whenever possible. Explore new methods of communication that leverage technology assets and reach a larger community audience.

Technology Future Map

Section of Plan	Strategy (Strategy for Change)	Action (Key Objectives)	Target Date:
SOFTWARE & DATA ACCESS			
E	Refine and follow the current process for purchases. Review pertinent policies and practices. Explore delivering each new or upgrade software request via the web. Test other types of remote access to appropriate District resources.	Utilize existing department or building groups to emphasize information sharing on software needs and purchases. Continue to look at software options on a multi-building or district-wide basis. Ensure secure access to data from outside locations, abiding by state and district law/policy.	Ongoing
CONNECTIVITY			
F	Upgrade switching, wireless access points, server infrastructure, cabling backbone, and Internet bandwidth to accommodate growth and new technology. Participate in regional planning regarding long-term hi-speed data circuits. Increase wireless laptop and tablet use. Develop effective wireless configurations and management. Begin discussing 1:1 student access strategies. Implement all capital projects to support all identified infrastructure needs.	Expand efforts and perform necessary upgrades as budgets permit. Continue discussions on obtaining long-term network upgrades to accommodate convergence of all technologies in our preferred future, keeping in mind the District's 2030 "Building Our Future Now" initiative.	Ongoing
POLICY			
G	Technology policies are reviewed each year and suggested changes are communicated to appropriate staff.	Refine policies as needed given introduction of newly requested technologies, capabilities, accesses, State requirements, and recommendations from Auditors.	Ongoing
SUPPORT			
H	Annually evaluate current conditions and service needs to make recommendations for the future. This would include district level support and in-building support.	Analyze changing needs for technical and instructional support relative to growth in technology integration and district or building initiatives. Promote HELPDESK utilization: 795-5324, Email HelpDesk@ , & Online Technical Support Form.	Ongoing
COMMUNICATION & COOPERATION			
I	Review current methods of communication and provide mechanisms to include all key stakeholders. Incorporate District 2030 "Building Our Future Now" initiative efforts. A strategic team called the Community Engagement/Relations Action Team will be vital as we spearhead this growth.	Expand current methods of communication where useful. Implement new methods of appropriate internal and external communication.	Ongoing

Technology Future Map

Section of Plan	Present (Present State & Trends)	Vision (Preferred Future)
FUNDING		
J	<p>Funding is gradually being restored from previous years of reduction but has not been fully restored from previous peak years. Current demands are not being completely met by extending the replacement cycle and forgoing some new requests. Spending practices maximize alternative sources such as BOCES, State, Federal monies, and Capital Project Aid.</p>	<p>Funding sources continue to meet all District needs over a shorter period of time. Capital Project funding is provided to deal with systemic improvement to deliver required access and content, particularly infrastructure and widely used classroom display technology. Annual funding streams, apart from any capital project, can be increased and sustained to support large scale initiatives of new technology while maintaining a sufficient replacement program.</p>
IMPLEMENTATION		
K	<p>Previous District Technology Committees met separately, annually, for review and updating of the plan. They were not totally effective as their makeup was unpredictable and often did not include the correct staff for making key decisions on curriculum, staff development and funding. Participation in the recently structured District 2030 "Building Our Future Now" initiative offers an alternative process.</p>	<p>The Technology Plan is modified through the lens of key decision-making groups; namely the four 2030 Engagement Action Teams, Administrative leadership teams, and teacher focused department groups which include the full PK-12 spectrum. Sub-committees or off-shoot groups are only created where absolutely necessary to complete research for a particular task. The key is to avoid a group attempting to make decisions in a technology silo and that lack the authority to implement the changes that are identified.</p>
ASSESSMENT		
L	<p>Many students are gradually improving limited technology skills and knowledge yet improvements must be made to acquire 21st Century Learning Fluencies and Common Core Standards attainment.</p>	<p>Simple indicators are used to provide feedback as students and teachers develop technology proficiencies. This will be influenced by regulation from the state regarding staff evaluation, required performance indicators, and mandated online testing such as NYS CBT (Computer Based Testing). All staff need to embrace expanding student technology skills.</p>

Technology Future Map

Section of Plan	Strategy (Strategy for Change)	Action (Key Objectives)	Target Date:
FUNDING			
J	Leverage state and federal programs such as BOCES aid, capital construction, Title II grants, and telecommunications discounts (E-Rate) to provide maximum funding. Pursue and implement technology specific capital project funding. Gradually increase local funding to previous year peak levels through voter approval. Funding and corresponding implementation strategy are reviewed annually and revised as needed to support identified needs. Evaluate systems options that can promote increased performance and longer retention of technology.	Maintain and maximize local and non-local share funding including E-rate. Consider replacement strategies based on individual user needs and new technology requests based on instructionally driven rationale & standardized evaluation.	Ongoing
IMPLEMENTATION			
K	Implement the inclusion of a voice in all relevant groups with technology integration as a focus in curriculum and staff development changes. This includes instructional technology expertise and technical support expertise relative to key short-term key objectives and long-term strategies.	Align vision and strategy with District 2030 "Building Our Future Now" initiative beginning with the first Strategic 2030 Engagement Action Team on Curriculum, Instruction, and Assessment.	Ongoing
ASSESSMENT			
L	Develop key indicators of student and staff technological knowledge and skills and begin monitoring trends. Share local initiatives at BOE meetings. Utilize District 2030 Action teams as means to review and modify these proficiencies (Professional Learning and Curriculum, Instruction, and Assessment Action Teams).	Work with District Action Teams that develop curriculum and student assessments to integrate technology.	Ongoing

Vision and Strategy for Student Outcomes

Background	<p>Students need to learn about technology, and they can often learn better using technology. As we nurture their development into lifelong learners, the learning outcomes we define and work toward must therefore include (1) the development of technological knowledge and skills as well as (2) the interdisciplinary use of technology in all areas of study. Students need to learn how to operate computer hardware, software, and peripherals. They also can learn using technology as they create, express, capture, record, experience, explore, communicate, collaborate, manage, and organize. This section considers the technology-related learning outcomes which this technology plan is designed to help produce.</p>	
Present State & Trends	<p><i>Benchmarks need to be updated to reflect the International Society for Technology in Education Standards (2016 ISTE), Common Core Learning Standards (CCLS), 21st Century Learning Outcomes, and District Curriculum. There continues to be inconsistency with implementation of and familiarity with the Benchmarks.</i></p>	
Preferred Future	<p><i>Benchmarks are updated to reflect ISTE, CCLS, and 21st Century Learning Fluencies. District assessments are aligned with the Benchmarks and assessment rubrics are designed to reflect integration of the Benchmarks. Benchmarks are aligned with Curriculum Committee work thru the 2030 "Building Our Future Now" initiative. Appropriate technology is made available to support the integration of all curriculum updates in support of the 2030 initiative. Utilize current and new committee structures to communicate and disseminate information.</i></p>	
Strategy for Change	<p><i>Refine district assessments to support the District 2030 "Building Our Future Now" process and include the updated technology benchmarks. Ensure all grade levels review.</i></p>	
	Key Objective	Target Date:
	<p><i>Continue to be integral in the district process of change and ensure the inclusion of technology benchmarks and technology integration in all levels of teaching.</i></p>	<p><i>Ongoing</i></p>

There are many sources to obtain curriculum information about the Common Core Learning Standards (CCLS) in New York State. The same is true regarding the International Society for Technology in Education Standards for students and teachers (ISTE), and the 21st Century Learning Outcomes. Below are some reliable sources that provide detail in all areas. These are maintained and have been referenced by the District in the past. On proceeding pages are more detail on the ISTE and 21st Century Learning Standards.

ISTE STANDARDS FOR STUDENTS

1. Empowered Learner

Students leverage technology to take an active role in choosing, achieving and demonstrating competency in their learning goals, informed by the learning sciences. Students:

- articulate and set personal learning goals, develop strategies leveraging technology to achieve them and reflect on the learning process itself to improve learning outcomes.
- build networks and customize their learning environments in ways that support the learning process.
- use technology to seek feedback that informs and improves their practice and to demonstrate their learning in a variety of ways.
- understand the fundamental concepts of technology operations, demonstrate the ability to choose, use and troubleshoot current technologies and are able to transfer their knowledge to explore emerging technologies.

2. Digital Citizen

Students recognize the rights, responsibilities and opportunities of living, learning and working in an interconnected digital world, and they act and model in ways that are safe, legal and ethical. Students:

- cultivate and manage their digital identity and reputation and are aware of the permanence of their actions in the digital world.
- engage in positive, safe, legal and ethical behavior when using technology, including social interactions online or when using networked devices.
- demonstrate an understanding of and respect for the rights and obligations of using and sharing intellectual property.
- manage their personal data to maintain digital privacy and security and are aware of data-collection technology used to track their navigation online.

3. Knowledge Constructor

Students critically curate a variety of resources using digital tools to construct knowledge, produce creative artifacts and make meaningful learning experiences for themselves and others. Students:

- plan and employ effective research strategies to locate information and other resources for their intellectual or creative pursuits.
- evaluate the accuracy, perspective, credibility and relevance of information, media, data or other resources.
- curate information from digital resources using a variety of tools and methods to create collections of artifacts that demonstrate meaningful connections or conclusions.
- build knowledge by actively exploring real-world issues and problems, developing ideas and theories and pursuing answers and solutions.

4. Innovative Designer

Students use a variety of technologies within a design process to identify and solve problems by creating new, useful or imaginative solutions. Students:

- a. know and use a deliberate design process for generating ideas, testing theories, creating innovative artifacts or solving authentic problems.
- b. select and use digital tools to plan and manage a design process that considers design constraints and calculated risks.
- c. develop, test and refine prototypes as part of a cyclical design process.
- d. exhibit a tolerance for ambiguity, perseverance and the capacity to work with open-ended problems.

5. Computational Thinker

Students develop and employ strategies for understanding and solving problems in ways that leverage the power of technological methods to develop and test solutions. Students:

- a. formulate problem definitions suited for technology-assisted methods such as data analysis, abstract models and algorithmic thinking in exploring and finding solutions.
- b. collect data or identify relevant data sets, use digital tools to analyze them, and represent data in various ways to facilitate problem-solving and decision-making.
- c. break problems into component parts, extract key information, and develop descriptive models to understand complex systems or facilitate problem-solving.
- d. understand how automation works and use algorithmic thinking to develop a sequence of steps to create and test automated solutions.

6. Creative Communicator

Students communicate clearly and express themselves creatively for a variety of purposes using the platforms, tools, styles, formats and digital media appropriate to their goals. Students:

- a. choose the appropriate platforms and tools for meeting the desired objectives of their creation or communication.
- b. create original works or responsibly repurpose or remix digital resources into new creations.
- c. communicate complex ideas clearly and effectively by creating or using a variety of digital objects such as visualizations, models or simulations.
- d. publish or present content that customizes the message and medium for their intended audiences.

7. Global Collaborator

Students use digital tools to broaden their perspectives and enrich their learning by collaborating with others and working effectively in teams locally and globally. Students:

- a. use digital tools to connect with learners from a variety of backgrounds and cultures, engaging with them in ways that broaden mutual understanding and learning.
- b. use collaborative technologies to work with others, including peers, experts or community members, to examine issues and problems from multiple viewpoints.
- c. contribute constructively to project teams, assuming various roles and responsibilities to work effectively toward a common goal.
- d. explore local and global issues and use collaborative technologies to work with others to investigate solutions.

ISTE STANDARDS FOR EDUCATORS

Empowered Professional

1. Learner

Educators continually improve their practice by learning from and with others and exploring proven and promising practices that leverage technology to improve student learning. Educators:

- Set professional learning goals to explore and apply pedagogical approaches made possible by technology and reflect on their effectiveness.
- Pursue professional interests by creating and actively participating in local and global learning networks.
- Stay current with research that supports improved student learning outcomes, including findings from the learning sciences.

2. Leader

Educators seek out opportunities for leadership to support student empowerment and success and to improve teaching and learning. Educators:

- Shape, advance and accelerate a shared vision for empowered learning with technology by engaging with education stakeholders.
- Advocate for equitable access to educational technology, digital content and learning opportunities to meet the diverse needs of all students.
- Model for colleagues the identification, exploration, evaluation, curation and adoption of new digital resources and tools for learning.

3. Citizen

Educators inspire students to positively contribute to and responsibly participate in the digital world. Educators:

- Create experiences for learners to make positive, socially responsible contributions and exhibit empathetic behavior online that build relationships and community.
- Establish a learning culture that promotes curiosity and critical examination of online resources and fosters digital literacy and media fluency.
- Mentor students in the safe, legal and ethical practices with digital tools and the protection of intellectual rights and property.
- Model and promote management of personal data and digital identity and protect student data privacy.

Learning Catalyst

4. Collaborator

Educators dedicate time to collaborate with both colleagues and students to improve practice, discover and share resources and ideas, and solve problems. Educators:

- a. Dedicate planning time to collaborate with colleagues to create authentic learning experiences that leverage technology.
- b. Collaborate and co-learn with students to discover and use new digital resources and diagnose and troubleshoot technology issues.
- c. Use collaborative tools to expand students' authentic, real-world learning experiences by engaging virtually with experts, teams and students, locally and globally.
- d. Demonstrate cultural competency when communicating with students, parents and colleagues and interact with them as co-collaborators in student learning.

5. Designer

Educators design authentic, learner-driven activities and environments that recognize and accommodate learner variability. Educators:

- a. Use technology to create, adapt and personalize learning experiences that foster independent learning and accommodate learner differences and needs.
- b. Design authentic learning activities that align with content area standards and use digital tools and resources to maximize active, deep learning.
- c. Explore and apply instructional design principles to create innovative digital learning environments that engage and support learning.

6. Facilitator

Educators facilitate learning with technology to support student achievement of the 2016 ISTE Standards for Students. Educators:

- a. Foster a culture where students take ownership of their learning goals and outcomes in both independent and group settings.
- b. Manage the use of technology and student learning strategies in digital platforms, virtual environments, hands-on makerspaces or in the field.
- c. Create learning opportunities that challenge students to use a design process and computational thinking to innovate and solve problems.
- d. Model and nurture creativity and creative expression to communicate ideas, knowledge or connections.

7. Analyst

Educators understand and use data to drive their instruction and support students in achieving their learning goals. Educators:

- a. Provide alternative ways for students to demonstrate competency and reflect on their learning using technology.
- b. Use technology to design and implement a variety of formative and summative assessments that accommodate learner needs, provide timely feedback to students and inform instruction.
- c. Use assessment data to guide progress and communicate with students, parents and education stakeholders to build student self-direction.

P21[®]

PARTNERSHIP FOR
21ST CENTURY LEARNING

Framework for 21st Century Learning

A unified vision for learning to ensure student success in a world where change is constant and learning never stops.

Copyright © 2007

21ST CENTURY STUDENT OUTCOMES AND SUPPORT SYSTEMS

The P21 Framework for 21st Century Learning was developed with input from educators, education experts, and business leaders to define and illustrate the skills, knowledge, expertise, and support systems that students need to succeed in work, life, and citizenship.

The Framework continues to be used by thousands of educators and hundreds of schools in the U.S. and abroad to put 21st century skills at the center of learning. All elements of the Framework are critical to ensure 21st century readiness for every student.

When a school, district, or state builds on this foundation, combining knowledge and skills with the necessary support systems of standards, assessments, curriculum and instruction, professional development, and learning environments - students are more engaged in the learning process and graduate better prepared to thrive in today's digitally and globally interconnected world.

Key Subjects and 21st Century Themes

Mastery of key subjects and 21st century themes is essential to student success. Key subjects include English, reading or language arts, world languages, arts, mathematics, economics, science, geography, history, government and civics.

In addition, schools must promote an understanding of academic content at much higher levels by weaving 21st century interdisciplinary themes into key subjects:

- Global Awareness
- Financial, Economic, Business and Entrepreneurial Literacy
- Civic Literacy
- Health Literacy
- Environmental Literacy

Learning and Innovation Skills

Learning and innovation skills are what separate students who are prepared for increasingly complex life and work environments in today's world and those who are not. They include:

- Creativity and Innovation
- Critical Thinking and Problem Solving
- Communication
- Collaboration

Information, Media and Technology Skills

Today, we live in a technology and media-driven environment, marked by access to an abundance of information, rapid changes in technology tools and the ability to collaborate and make individual contributions on an unprecedented scale. Effective citizens and workers must be able to exhibit a range of functional and critical thinking skills, such as:

- Information Literacy
- Media Literacy
- ICT (Information, Communications and Technology) Literacy

Life and Career Skills

Today's students need to develop thinking skills, content knowledge, and social and emotional competencies to navigate complex life and work environments. P21's essential Life and Career Skills include:

- Flexibility and Adaptability
- Initiative and Self-Direction
- Social and Cross-Cultural Skills
- Productivity and Accountability
- Leadership and Responsibility

21ST CENTURY SUPPORT SYSTEMS

21st century learning requires an innovative support system to engage learners through applicable skills and knowledge, appropriate technologies, and real-world connections to make learning relevant, personalized, and engaging. P21 has identified five critical support systems to ensure all students receive the kinds of learning experiences that build 21st century competency:

- 21st Century Standards
- Assessments of 21st Century Skills
- 21st Century Curriculum and Instruction
- 21st Century Professional Development
- 21st Century Learning Environments

P21 Framework Definitions

To help practitioners integrate skills into the teaching of key academic subjects, the Partnership has developed a unified, collective vision for learning known as the Framework for 21st Century Learning. This Framework describes the skills, knowledge and expertise students must master to succeed in work and life; it is a blend of content knowledge, specific skills, expertise and literacies.

Every 21st century skills implementation requires the development of key academic subject knowledge and understanding among all students. Those who can think critically and communicate effectively must build on a base of key academic subject knowledge.

Within the context of key knowledge instruction, **students must also learn the essential skills for success in today’s world, such as critical thinking, problem solving, communication and collaboration.**

When a school or district builds on this foundation, combining the entire Framework with the necessary support systems—standards, assessments, curriculum and instruction, professional development and learning environments—students are more engaged in the learning process and graduate better prepared to thrive in today’s global economy.

While the graphic represents each element distinctly for descriptive purposes, the Partnership views all the components as fully interconnected in the process of 21st century teaching and learning.

21st CENTURY STUDENT OUTCOMES

The elements described in this section as “21st century student outcomes” (represented by the rainbow) are the knowledge, skills and expertise students should master to succeed in work and life in the 21st century.

Key SUBJECTS AND 21st CENTURY THEMES

Mastery of **key subjects and 21st century themes** is essential for all students in the 21st century. **Key** subjects include:

- English, reading or language arts
- World languages
- Arts
- Mathematics
- Economics
- Science
- Geography
- History
- Government and Civics

In addition to these subjects, we believe schools must move to include not only a focus on mastery of key subjects, but also promote understanding of academic content at much higher levels by weaving **21st century interdisciplinary themes** into key subjects:

Global Awareness

- Using 21st century skills to understand and address global issues
- Learning from and working collaboratively with individuals representing diverse cultures, religions and lifestyles in a spirit of mutual respect and open dialogue in personal, work and community contexts
- Understanding other nations and cultures, including the use of non-English languages

Financial, Economic, Business and Entrepreneurial Literacy

- Knowing how to make appropriate personal economic choices
- Understanding the role of the economy in society
- Using entrepreneurial skills to enhance workplace productivity and career options

Civic Literacy

- Participating effectively in civic life through knowing how to stay informed and understanding governmental processes
- Exercising the rights and obligations of citizenship at local, state, national and global levels
- Understanding the local and global implications of civic decisions

Health Literacy

- Obtaining, interpreting and understanding basic health information and services and using such information and services in ways that enhance health
- Understanding preventive physical and mental health measures, including proper diet, nutrition, exercise, risk avoidance and stress reduction
- Using available information to make appropriate health-related decisions
- Establishing and monitoring personal and family health goals
- Understanding national and international public health and safety issues

Environmental Literacy

- Demonstrate knowledge and understanding of the environment and the circumstances and conditions affecting it, particularly as relates to air, climate, land, food, energy, water and ecosystems
- Demonstrate knowledge and understanding of society's impact on the natural world (e.g., population growth, population development, resource consumption rate, etc.)
- Investigate and analyze environmental issues, and make accurate conclusions about effective solutions
- Take individual and collective action towards addressing environmental challenges (e.g., participating in global actions, designing solutions that inspire action on environmental issues)

LEARNING AND INNOVATION SKILLS

Learning and innovation skills increasingly are being recognized as those that separate students who are prepared for a more and more complex life and work environments in the 21st century, and those who are not. A focus on creativity, critical thinking, communication and collaboration is essential to prepare students for the future.

CREATIVITY AND INNOVATION***Think Creatively***

- Use a wide range of idea creation techniques (such as brainstorming)
- Create new and worthwhile ideas (both incremental and radical concepts)
- Elaborate, refine, analyze and evaluate their own ideas in order to improve and maximize creative efforts

Work Creatively with Others

- Develop, implement and communicate new ideas to others effectively
- Be open and responsive to new and diverse perspectives; incorporate group input and feedback into the work
- Demonstrate originality and inventiveness in work and understand the real world limits to adopting new ideas

- View failure as an opportunity to learn; understand that creativity and innovation is a long-term, cyclical process of small successes and frequent mistakes

Implement Innovations

- Act on creative ideas to make a tangible and useful contribution to the field in which the innovation will occur

CRITICAL THINKING AND PROBLEM SOLVING

Reason Effectively

- Use various types of reasoning (inductive, deductive, etc.) as appropriate to the situation

Use Systems Thinking

- Analyze how parts of a whole interact with each other to produce overall outcomes in complex systems

Make Judgments and Decisions

- Effectively analyze and evaluate evidence, arguments, claims and beliefs
- Analyze and evaluate major alternative points of view
- Synthesize and make connections between information and arguments
- Interpret information and draw conclusions based on the best analysis
- Reflect critically on learning experiences and processes

Solve Problems

- Solve different kinds of non-familiar problems in both conventional and innovative ways
- Identify and ask significant questions that clarify various points of view and lead to better solutions

COMMUNICATION AND COLLABORATION

Communicate Clearly

- Articulate thoughts and ideas effectively using oral, written and nonverbal communication skills in a variety of forms and contexts
- Listen effectively to decipher meaning, including knowledge, values, attitudes and intentions
- Use communication for a range of purposes (e.g. to inform, instruct, motivate and persuade)
- Utilize multiple media and technologies, and know how to judge their effectiveness a priori as well as assess their impact
- Communicate effectively in diverse environments (including multi-lingual)

Collaborate with Others

- Demonstrate ability to work effectively and respectfully with diverse teams
- Exercise flexibility and willingness to be helpful in making necessary compromises to accomplish a common goal

- Assume shared responsibility for collaborative work, and value the individual contributions made by each team member

INFORMATION, MEDIA AND TECHNOLOGY SKILLS

People in the 21st century live in a technology and media-driven environment, marked by various characteristics, including: 1) access to an abundance of information, 2) rapid changes in technology tools, and 3) the ability to collaborate and make individual contributions on an unprecedented scale. Effective citizens and workers of the 21st century must be able to exhibit a range of functional and critical thinking skills related to information, media and technology.

INFORMATION LITERACY

Access and Evaluate Information

- Access information efficiently (time) and effectively (sources)
- Evaluate information critically and competently

Use and Manage Information

- Use information accurately and creatively for the issue or problem at hand
- Manage the flow of information from a wide variety of sources
- Apply a fundamental understanding of the ethical/legal issues surrounding the access and use of information

MEDIA LITERACY

Analyze Media

- Understand both how and why media messages are constructed, and for what purposes
- Examine how individuals interpret messages differently, how values and points of view are included or excluded, and how media can influence beliefs and behaviors
- Apply a fundamental understanding of the ethical/legal issues surrounding the access and use of media

Create Media Products

- Understand and utilize the most appropriate media creation tools, characteristics and conventions
- Understand and effectively utilize the most appropriate expressions and interpretations in diverse, multi-cultural environments

ICT (Information, Communications and Technology) LITERACY

Apply Technology Effectively

- Use technology as a tool to research, organize, evaluate and communicate information

- Use digital technologies (computers, PDAs, media players, GPS, etc.), communication/networking tools and social networks appropriately to access, manage, integrate, evaluate and create information to successfully function in a knowledge economy
- Apply a fundamental understanding of the ethical/legal issues surrounding the access and use of information technologies

LIFE AND CAREER SKILLS

Today's life and work environments require far more than thinking skills and content knowledge. The ability to navigate the complex life and work environments in the globally competitive information age requires students to pay rigorous attention to developing adequate life and career skills.

FLEXIBILITY AND ADAPTABILITY

Adapt to Change

- Adapt to varied roles, jobs responsibilities, schedules and contexts
- Work effectively in a climate of ambiguity and changing priorities

Be Flexible

- Incorporate feedback effectively
- Deal positively with praise, setbacks and criticism
- Understand, negotiate and balance diverse views and beliefs to reach workable solutions, particularly in multi-cultural environments

INITIATIVE AND SELF-DIRECTION

Manage Goals and Time

- Set goals with tangible and intangible success criteria
- Balance tactical (short-term) and strategic (long-term) goals
- Utilize time and manage workload efficiently

Work Independently

- Monitor, define, prioritize and complete tasks without direct oversight

Be Self-directed Learners

- Go beyond basic mastery of skills and/or curriculum to explore and expand one's own learning and opportunities to gain expertise
- Demonstrate initiative to advance skill levels towards a professional level
- Demonstrate commitment to learning as a lifelong process
- Reflect critically on past experiences in order to inform future progress

SOCIAL AND CROSS-CULTURAL SKILLS

Interact Effectively with Others

- Know when it is appropriate to listen and when to speak

- Conduct themselves in a respectable, professional manner

Work Effectively in Diverse Teams

- Respect cultural differences and work effectively with people from a range of social and cultural backgrounds
- Respond open-mindedly to different ideas and values
- Leverage social and cultural differences to create new ideas and increase both innovation and quality of work

PRODUCTIVITY AND ACCOUNTABILITY

Manage Projects

- Set and meet goals, even in the face of obstacles and competing pressures
- Prioritize, plan and manage work to achieve the intended result

Produce Results

- Demonstrate additional attributes associated with producing high quality products including the abilities to:
 - Work positively and ethically
 - Manage time and projects effectively
 - Multi-task
 - Participate actively, as well as be reliable and punctual
 - Present oneself professionally and with proper etiquette
 - Collaborate and cooperate effectively with teams
 - Respect and appreciate team diversity
 - Be accountable for results

LEADERSHIP AND RESPONSIBILITY

Guide and Lead Others

- Use interpersonal and problem-solving skills to influence and guide others toward a goal
- Leverage strengths of others to accomplish a common goal
- Inspire others to reach their very best via example and selflessness
- Demonstrate integrity and ethical behavior in using influence and power

Be Responsible to Others

- Act responsibly with the interests of the larger community in mind

21st CENTURY SUPPORT SYSTEMS

The elements described below are the critical systems necessary to ensure student mastery of 21st century skills. 21st century standards, assessments, curriculum, instruction, professional development and learning environments must be aligned to produce a support system that produces 21st century outcomes for today's students.

21st Century Standards

- Focus on 21st century skills, content knowledge and expertise
- Build understanding across and among key subjects as well as 21st century interdisciplinary themes
- Emphasize deep understanding rather than shallow knowledge
- Engage students with the real world data, tools and experts they will encounter in college, on the job, and in life; students learn best when actively engaged in solving meaningful problems
- Allow for multiple measures of mastery

Assessment of 21st Century Skills

- Supports a balance of assessments, including high-quality standardized testing along with effective formative and summative classroom assessments
- Emphasizes useful feedback on student performance that is embedded into everyday learning
- Requires a balance of technology-enhanced, formative and summative assessments that measure student mastery of 21st century skills
- Enables development of portfolios of student work that demonstrate mastery of 21st century skills to educators and prospective employers
- Enables a balanced portfolio of measures to assess the educational system's effectiveness in reaching high levels of student competency in 21st century skills

21st Century Curriculum and Instruction

- Teaches 21st century skills discretely in the context of key subjects and 21st century interdisciplinary themes
- Focuses on providing opportunities for applying 21st century skills across content areas and for a competency-based approach to learning
- Enables innovative learning methods that integrate the use of supportive technologies, inquiry- and problem-based approaches and higher order thinking skills
- Encourages the integration of community resources beyond school walls

21st Century Professional Development

- Highlights ways teachers can seize opportunities for integrating 21st century skills, tools and teaching strategies into their classroom practice — and help them identify what activities they can replace/de-emphasize
- Balances direct instruction with project-oriented teaching methods
- Illustrates how a deeper understanding of subject matter can actually enhance problem-solving, critical thinking, and other 21st century skills
- Enables 21st century professional learning communities for teachers that model the kinds of classroom learning that best promotes 21st century skills for students
- Cultivates teachers' ability to identify students' particular learning styles, intelligences, strengths and weaknesses

- Helps teachers develop their abilities to use various strategies (such as formative assessments) to reach diverse students and create environments that support differentiated teaching and learning
- Supports the continuous evaluation of students' 21st century skills development
- Encourages knowledge sharing among communities of practitioners, using face-to-face, virtual and blended communications
- Uses a scalable and sustainable model of professional development

21st Century Learning Environments

- Create learning practices, human support and physical environments that will support the teaching and learning of 21st century skill outcomes
- Support professional learning communities that enable educators to collaborate, share best practices and integrate 21st century skills into classroom practice
- Enable students to learn in relevant, real world 21st century contexts (e.g., through project-based or other applied work)
- Allow equitable access to quality learning tools, technologies and resources
- Provide 21st century architectural and interior designs for group, team and individual learning
- Support expanded community and international involvement in learning, both face-to-face and online

About the Partnership for 21st Century Learning

The Partnership for 21st Century Learning recognizes that all learners need educational experiences in school and beyond, from cradle to career, to build knowledge and skills for success in a globally and digitally interconnected world. Representing over 5 million members of the global workforce, P21 unites business, government and education leaders from the U.S. and abroad to advance evidence-based education policy and practice and to make innovative teaching and learning a reality for all.

P21 and member organizations provide tools and resources that help facilitate and drive this necessary change.

Learn more and get involved at www.p21.org.

K-4

-
1. Basic Operations and Concepts
 3. Technology Productivity Tools
 5. Technology Research Tools
-

2. Social, Ethical, and Human Issues
 4. Technology Communication Tools
 6. Technology Problem-solving and Decision Making
-

- * All grades need to practice and extend competencies of previous grade levels.
- * Numbers in parenthesis after the benchmark indicate coordinating standard(s).

Kindergarten

1. Identify 6 parts-keyboard, monitor, CPU, disk drive, mouse & printer. (1)
2. Turn on computer system (or power strip), learn to load and remove CD's, and learn to run a program from the Start Menu. (1)
3. Run simple programs (basic instructions on screen- e.g. Reader Rabbit, Word Munchers, Living Books, WiggleWorks etc.) (1)
4. Know proper procedures for exiting from a file or program and for shutting down the computer. (2)
5. Work cooperatively and collaboratively with peers when using technology in the classroom. (2)
6. Demonstrate responsible use of technology (wait for hourglass, close programs and pop ups...) (2)
7. Communicate ideas using pictures and/or words (i.e. Paint,

- WiggleWorks, Kidspiration, KidPix etc.) (3, 4)
8. Use developmentally appropriate books to support learning. (5)
 9. Solve computer problems using developmentally appropriate and accurate terminology (6)
 10. Use technology resources (i.e. puzzles, logical thinking programs) for problem solving. (6)

Grade 1

1. Begin to use proper posture. (1)
2. Identify memory devices (i.e. CD-Rom, H drive, C drive...) (1)
3. Use shift, backspace, arrows, Enter key, letter keys, number keys, and punctuation keys. (1)
4. Develop positive attitudes toward technology. (2)
5. Begin to read and follow on screen directions (3)
6. Type/Draw and Print simple stories (i.e. using WiggleWorks,

- MS Word, Paint, Kidspiration...) (4,6)
7. Awareness of electronic resources (i.e. websites, encyclopedia, CD ROMs) (5)

Grade 2

1. Begin to use proper keyboarding techniques (i.e. two hands on keyboard) (1)
2. Use Word processing programs (3, 4)
3. Type and print simple stories (i.e. using WiggleWorks, MS Word, Kidspiration...) (4, 6)
4. Use of electronic resources (i.e. websites, encyclopedias, CD ROMs...) (5)

Grade 3

1. Use proper keyboarding techniques (i.e. left-right hand placement, use home row keys...) (1)
2. Demonstrate ability to name, save, retrieve, and print saved work. (2)

3. Use formatting skills for word processing (i.e. bold, capital letters, indentations) (3, 4)
4. Demonstrate ability to conduct searches using electronic catalogs (5)
5. Understand concept and use of websites (5, 6)

Grade 4

1. Evaluate websites for appropriate use. (2)
2. Use word-processing and editing skills (i.e. spell checker, thesaurus, cut, copy, and paste,) (3, 4)
3. Begin to use, cite, and evaluate electronic resources/references tools. (5)
4. Exposure to emerging technologies including specialized input devices (i.e. microscopes, digital cameras, science probes, Palm handhelds...) (5, 6)

Suggested Instructional Time:	Suggested Placement in Calendar Map (Month):

Note: A folder on the District Intranet contain *Suggested Activities* related to this curriculum

K – 12 District Technology (Curriculum) Committee:

Marcy Bates (Facilitator), Marcy DeNunzio, Mellisa Devitt, Mary Hancock, Heather Henry, Gennie Houck, Stephanie Lewis, Louisa McNaney, Jason Schrage, Michelle Tillinghast, Alice Learn (Curriculum Coordinator)

5-6

-
1. Basic Operations and Concepts
 3. Technology Productivity Tools
 5. Technology Research Tools
-

2. Social, Ethical, and Human Issues
 4. Technology Communication Tools
 6. Technology Problem-solving and Decision Making
-

- * All grades need to practice and extend competencies of previous grade levels.
- * Numbers in parenthesis after the benchmark indicate coordinating standard(s).

Grade 5

1. Use keyboards and other common input/output devices efficiently and effectively. (1)
2. Discuss common uses of technology in daily life (advantages and disadvantages). (1, 2)
3. Discuss basic issues related to responsible use of technology and information and describe personal consequences of inappropriate use. (2)
4. Extend the use of technology tools to support personal productivity, remediate skill deficits, and facilitate learning throughout the curriculum (ex. word processing, graphics, charts, tables, Cornerstone). (3)
5. Determine which technology is useful and select the appropriate tool(s) and technology resources to address a variety of tasks and problems. (5, 6)
6. Evaluate the accuracy, relevance, appropriateness, comprehensiveness, and bias of electronic information sources. (6)
7. Use telecommunications to investigate curriculum related problems, issues, and information (ex. Internet, Virtual Field Trips). (4, 5)

Grade 6

1. Demonstrate an understanding of concepts underlying hardware, software, and connectivity, and of practical applications to learning and problem solving. (1)
2. Awareness of current changes in information technologies and the effect those changes have on society.
3. Develop basic trouble-shooting skills. (1)
4. Exhibit legal and ethical behaviors when using information and technology and discuss consequences of misuse. (2)
5. Design, develop, publish and present products using technology resources that demonstrate and communicate concepts to audiences. (4, 5, 6)
6. Research and evaluate the accuracy, relevance, appropriateness, comprehensiveness, and bias of electronic information sources. (2, 3, 5, 6)
7. Select and use appropriate tools and technology resources to accomplish a variety of tasks and solve problems. (5, 6)
8. Use telecommunications and online resources to participate in collaborative problem-solving activities for the purpose of developing solutions or products for audiences. (3, 4, 5)

5. Technology Research Tools	6. Technology Problem-solving and Decision Making

- * All grades need to practice and extend competencies of previous grade levels.
- * Numbers in parenthesis after the benchmark indicate coordinating standard(s).

GRADES 7 - 8

All students should have opportunities to demonstrate the following performances:

1. Apply strategies for identifying and solving routine hardware and software problems that occur during everyday use. (1)
2. Demonstrate knowledge of current changes in information technologies and the effect those changes have on the workplace and society. (2)
3. Exhibit legal and ethical behaviors when using information and technology, and discuss consequences of misuse. (2)
4. Use content-specific tools, software, and simulations to support learning and research. (3, 5)
5. Apply productivity/multimedia/ telecommunications tools and peripherals to support personal productivity, group collaboration, and learning throughout the curriculum. (3, 6)
6. Design, develop, publish, and present products using technology resources that demonstrate and communicate curriculum concepts. (4, 5, 6)
7. Select and use appropriate technology resources to accomplish a variety of tasks and solve problems. (5, 6)
8. Demonstrate an understanding of concepts underlying hardware and software and their practical applications to learning and problem solving. (1, 6)

Vision and Strategy for Staff Development

Background	<p>Faculty and staff can often teach, learn, and manage better by integrating technology as they work to produce improved learning outcomes among the students they serve. It is a critical yet difficult challenge to provide staff development opportunities that accommodate the broad range of staff learning styles, teaching styles, and technological skill and comfort. Districts must balance the limited supply of time and resources against the demand to “cast a wide net” of learning opportunities and incentives. This section describes the staff development strategy and specific opportunities and incentives that will be provided to develop basic staff proficiency and to encourage & support integration of technology into teaching and learning.</p>	
Present State & Trends	<p><i>While many technology staff development opportunities are available, not all staff take advantage of the opportunities that exist.</i></p>	
Preferred Future	<p><i>All staff make extensive use of technology and instructional support resources and participate in training opportunities. Align Staff Development efforts with District 2030 "Building Our Future Now" initiative and resulting curriculum changes.</i></p>	
Strategy for Change	<p><i>Improve communication and dissemination of staff development opportunities and resources including home-grown in-services and outside resources. Investigate use of online in-service options with the In-service committee.</i></p>	
Key Objective <small>(specific, achievable, scheduled, and delegated)</small>		Target Date:
	<p><i>Provide training opportunities for all staff. Customize training wherever possible. Critically explore additional online staff development models.</i></p>	<p><i>Ongoing</i></p>

Staff Development Methods

STAFF DEVELOPMENT ELEMENT / ASPECT	PRESENT IMPLEMENTATION	PREFERRED IMPLEMENTATION	FOCUS AREA?
a. Professional Development Needs Assessment Survey	Needs Assessment Survey developed by ESC staff	Online-based: results compiled and used to refine training as needed.	<input type="checkbox"/>
b. Teacher-Based Planning (annual goals, PDP planning)	PDP Options, Site Team Planning, Technology Committee, use skills from workshops	Administrative support/pressure to use acquired skills; integrate Technology Benchmarks into planning and maps.	<input checked="" type="checkbox"/>
c. Courses & Workshops (local & external providers)	BOCES SIP, Horseheads, Model Schools, Teacher Center, Outside conferences	Pre-assessments, pre-requisites, online trainings free up time to attend other sessions.	<input checked="" type="checkbox"/>
d. Library of Training Materials (books, videos, tutorials, etc.)	Staff Development library, online database of software, school libraries, online tutorials, IST materials, Teachers' Center, read/route magazines	Promote awareness of /online access to materials in SD libraries; promote awareness of other online materials (tutorials, etc.).	<input type="checkbox"/>
e. Professional Online websites (attendance, grading, etc.)	Testing possible sites	Successfully utilizing online sites.	<input checked="" type="checkbox"/>
f. Train-the-Trainer Program (lead-users trained/available)	Train-the-Trainer Program in place and special programs such as "white board Wednesdays"	Continued development of T-t-T concepts.	<input type="checkbox"/>
g. Mentors / Learning Teams (organized support system)	PDP mentors and Peer Partners, T-t-T support, Dept Chair initiated	Incorporate Instructional Tech. Specialists more formally into mentoring process; PDP options; incorporate Technology Benchmarks.	<input checked="" type="checkbox"/>
h. External Collaboration (conferences, site visits, etc.)	Limited conference money available, time/coverage for site visits	Opportunity for attendance at high-quality technology conferences; separate budget for technology conference attendance.	<input type="checkbox"/>
i. External Collaboration (Model School Program)	Model Schools Program	Easy access to peers regardless of location to share common interests.	<input type="checkbox"/>
j. Internal Collaboration (Technology day, Supt. Conf Day, newsletters, Intranet)	ESC generated information, ESC Newsletter, Website, Intranet, Videos, Blogs	Continuing	<input type="checkbox"/>
k. Portable Technology for Staff (notebooks/laptops/tablets)	Wireless Laptops & Labs, shared Laptops, Tablets, Interactive white boards, Panels, Response systems, Unique projects	Expand all use - Leverage wireless network capabilities inside and outside buildings brought about by Capital Projects.	<input checked="" type="checkbox"/>
l. Software Learning Systems (vendor provided training)	Moby Max, Learning A-Z, Library automation, BOCES STEM, Fast ForWord - as examples	Continue research of appropriate programs.	<input checked="" type="checkbox"/>

Staff Development Methods

m. Staff Hiring Standards & New Orientation (technology proficiency)	Core training is not required (online or classroom); interview questions about personal and professional use of technology - needs updating	Develop assessment tool to evaluate new staff in a timely manner. Offer online "Basic" training to all new staff on core proficiencies.	<input checked="" type="checkbox"/>
n. Online offerings of mandated safety training, IE Right To Know	Online Right To Know offered in Fall; long completion period permitted	Shorten duration to complete online training	<input type="checkbox"/>

Staff Development Calendar

Recurring Staff Development Tasks & Events			
JUL	Curriculum Development	Summer inservices	Course development
AUG	Curriculum Development	Summer inservices	Course development
SEP	CORE Trainings	Newsletters begin	
OCT	Model Schools, Supt Conference Day	Fall courses begin	Notification and reminders of sign-up begins
NOV	NYSCaTE Conference	State Level Technology Conference	
DEC			
JAN			
FEB	Winter Inservice begins, Model Schools		Notification and reminders of sign-up begins
MAR	Technology Fair/Supt. Conference Day	District-wide, Held annually	Internal and external presenters
APR			
MAY			
JUN	CORE Trainings / Model Schools	Specific Conferences identified throughout the year. Model Schools Summer courses begin.	Bi-weekly ESC instructional technology review including ongoing staff development

Staff Proficiency Standards

<p><u>General Competencies:</u> Teachers and other staff (as appropriate) are expected to become proficient at operating and routinely using the following core technology capabilities:</p>	
<input checked="" type="checkbox"/> Basic Operation, Network Shares <input checked="" type="checkbox"/> Office Suite <input checked="" type="checkbox"/> Printing/B/W & Color Copiers <input checked="" type="checkbox"/> APPR Related	<input checked="" type="checkbox"/> Collaboration Tools - OneNote <input checked="" type="checkbox"/> Client and Cloud Email <input checked="" type="checkbox"/> Internet Resources <input checked="" type="checkbox"/> Data Security Mindedness
<p><u>Specific/Local Applications:</u> Teachers and other staff (as appropriate) are expected to become proficient at operating and routinely using the following local applications and procedures:</p>	
<input checked="" type="checkbox"/> Attendance Program <input checked="" type="checkbox"/> Grading Program <input checked="" type="checkbox"/> Intranet <input checked="" type="checkbox"/> Staff /Mgt Evaluation- APPR, MPPR <input checked="" type="checkbox"/> Other: Web Page or other parental communication resource	<input checked="" type="checkbox"/> Automated Library System <input checked="" type="checkbox"/> Lesson Plan Development <input checked="" type="checkbox"/> Student Records <input checked="" type="checkbox"/> Integrated Tools Package (i.e., Microsoft Office) Other: SchoolTool Parent Portal
<p><u>Specialized Competencies:</u> Teachers are also expected to become proficient at other technology capabilities which <i>they have identified</i> as integral to their curriculum and teaching style. This can include (but is not limited to):</p>	
Adobe Cloud Suite products Tablet APPs Mobile & Interactive Board/Panel Technology Digital Photography / Video / Document Camera Digital Audio & Video Recording Interactive & Immediate Response Technologies Multimedia Books & Guided Exploration Toolbox Pro / Collaboration tools	Department/Curriculum Tools as Identified Scientific Interface, Simulations Discussion Groups Video Conferencing & Video Steaming Supplementary Textbook Online Tools-ELA,Math Office Suite Programs Mapping and Organizer Programs Curriculum Specific Web-based Software

Vision and Strategy for Workstation Access

Background	<p>Computers come in a variety of forms, including desktops, mobile computers (a.k.a. “laptops”, “notebooks”, or "tablets"), hand-held computers, and other specialized computing devices. This section contains the district’s “baseline” plan for providing students and staff with access to workstations. (If the access levels specified do not meet the needs of your department, office, or classroom, be sure to provide inputs to your principal regarding your preferences & unique needs.) Additionally, this section contains specifications and inventory and also addresses planning for obsolescence.</p>	
Present State & Trends	<p><i>Computers are added and/or replaced at an average annual rate of approx. 15%. The original goal has been 20% per year. The compromise is a realistic balance between replacement, new technology, and fiscal reductions. Replacement is tied to physical changes and industry and instructional trends (IE: software, performance, excessive breakage, new technology).</i></p>	
Preferred Future	<p><i>All staff have appropriate technology to implement the Technology Plan.</i></p>	
Strategy for Change	<p><i>Critically analyze replacement and new requests each year with regard to need. Consider new mobile technology over traditional desktop technology. Cascade older equipment for re-use or replacement as needed.</i></p>	
Key Objective <small>(specific, achievable, scheduled, and delegated)</small>		Target Date:
	<p><i>Refine implementation of new and replacement technology using request form, frequent review of usage data, classroom visitation, and budget accountability.</i></p>	<i>Ongoing</i>

Workstation Access Requirements

Summary (Sum of all Building Requirements)

Requirements By Building	Basic Workstation Design or Type									
	Desktops	Laptops	Netbooks	Tablets						
Elementary - Big Flats	All technology inventory is maintained in the RAMI system (inventory database). This includes some 7,400 records including BOCES and HCSD owned devices.									
Elementary - Center St										
Elementary - Gardner Rd										
Elementary - Ridge Rd										
Intermediate School	Approximately 4,500 of the 7,400 devices in RAMI are qualified as computing instructional devices, IE desktop, laptop, notebook, and tablet computers.									
Middle School										
High School										
District Services										
Total Number Required	0	0	0	0	0	0	0	0	0	0
Number Now In Service	0	0	0	0	0	0	0	0	0	0
Number To Be Added/Replaced researched annually - Possible Replacement Schedule below										
School Year		See Spreadsheet C-2 Addendum 1 for replacement analysis sorted by location, then age.

Device Estimates:									
Desktop w/monitor, 3050		\$564.00							
Desktop no/monitor, 3050		\$464.00							
Laptop, 5480		\$579.62							
Laptop/Cart, 3380		\$660.00							
Student Laptop, 3189		\$457.00							
Tablet IOS		\$399.00							
Tablet Win, Surface, AIO		\$800.00							
Web/Cloud Tablet Win		\$250.00							
<i>Number in Count row does not reflect total number devices affected that year. Refer to individual details listed for total number.</i>									
Balancing Criteria									
Age									
Spread out over time, 5-7years on average. Tablets are approximately 5 years.									
Budget for "new", non-replacement technology after current replacements. Evaluate all replacement decisions with Principals. Provide usage data.									
Supplementing budgets with Erate will eventually end as Erate discounts decrease and applicable telecomm services decrease.

Vision and Strategy for Peripheral Access

Background	<p>Computer peripherals are devices which operate physically external to a computer to enable it to interface with users in various ways. Some enable users to provide inputs to the computer (keyboard, mouse, microphone, camera, document cameras, sensors, etc.) while others enable the computer to deliver outputs to the user (speakers, printers, projectors, interactive white boards and panels, voice enhancement, immediate response devices, etc.) As networks improve, they can be leveraged to consolidate certain peripheral functions. Using adaptive devices (vision, hearing, speech, touch, etc.) special needs learners can more equitably access computers. This section describes district needs for access to computer peripherals.</p>	
Present State & Trends	<p><i>Current funding strategy allows for the purchase of most requested peripherals with the exception of the interactive white boards, which are in nearly all classrooms. Replacements are available for failed equipment. Training is available when requested.</i></p>	
Preferred Future	<p><i>Meet all students' and staff members' needs in a timely way with regard to provisioning, training, support, and convenient access to peripheral devices. Effective and efficient copier and printer management is sustained. Be in support of needs generated through the District 2030 "Building Our Future Now" initiative.</i></p>	
Strategy for Change	<p><i>Continue to analyze needs annually from an obsolescence and provision basis in each building. Research ways to replace interactive whiteboards with new panel/monitor technology through sources such as SMART bond, capital projects, or other non-traditional funding. Cost efficiencies and aid generation are a priority.</i></p>	
Key Objective		Target Date:
<p><i>(specific, achievable, scheduled, and delegated)</i></p>		
	<p><i>Refine implementation of new and replacement technology using request form, frequent review of usage data, classroom visitation, and budget accountability.</i></p>	<p><i>Ongoing</i></p>

Peripheral Access Requirements

Summary (Sum of all Building Requirements)

Requirements By Building	Peripheral Type														
	Printer	Copier-Printers	Scanner	Document Camera	Digital Camera/Camcorder	Interactive White Board	Interactive Panel	Electronic Responder Package	Electronic Slate	Digital Projector	Personal Handheld Computer	TV Monitor & Converter	VCR - DVD - Combo Player	Scientific Interface - Calculator	
Elem Schools															
Intermediate School	All peripherals inventory is maintained by building in the RAMI system (inventory database). Items are identified for replacement multiple ways: 1) replacement year tagging in the RAMI database, 2) breakage where the unit cannot be repaired, and 3) thru the technology request process. Older technologies such as TV's and VCR/DVD players will not be replaced in lieu of other solutions and delivery methods such as Safari Montage and interactive whiteboard and panel projection. New peripheral technologies will be identified, researched and implemented.														
Middle School															
High School															
District Services															
*Storage/Spares															
Total Number Required	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0
Number Now In Service	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0
Number To Be Added	Determined as needed annually														
School Year	Peripheral data in the District can be sorted by Location, then Device Type and extracted from the RAMI system upon request.														
	*Please Note - Storage/Spares is a combination of actual spares ready for use and a number of units that have come out of operation and are awaiting disposition, particularly some older projectors.														

Vision and Strategy for Software and Data Access

Background	An ever-increasing number of software programs are available for use by students and staff. When wisely integrated into teaching and learning, many of these programs can become valuable educational tools. Similarly, there is also an increasing amount of electronic data that is or can be available. Students, staff, parents, and community members can benefit from appropriate and secure access to district information such as student records, schedules, homework, and library resources. With so many options, it is important to balance individuals' unique needs against broader needs for standardization, security, privacy, and low costs. This section describes how access to software and data will be managed.	
Present State & Trends	<i>Convenient access to core applications is available in pertinent locations. A broad variety of software packages are installed on computers. When appropriate, standardized software is purchased and deployed. Information about existing software, relative to standardization, is shared electronically. Nearly all applications are web based.</i>	
Preferred Future	<i>Product information is shared efficiently. Web-based software and data access options should be explored due to their availability both remotely and from schools. State & District auditors recommendations relative to HIPAA, FERPA, & Parents Bill Of Rights should be included. Remote access to District managed resources includes security planning with strict adherence to NYS Schedule 2-d law. Benchmark, CCLS, 21st Century Standards, and ISTE Standards are routinely considered in purchasing decisions.</i>	
Strategy for Change	<i>Refine and follow the current process for purchases. Review pertinent policies and practices. Explore delivering each new or upgrade software request via the web. Test other types of remote access to appropriate District resources.</i>	
Key Objective <small>(specific, achievable, scheduled, and delegated)</small>		Target Date:
	<i>Utilize existing department or building groups to emphasize information sharing on software needs and purchases. Continue to look at software options on a multi-building or district-wide basis. Ensure secure access to data from outside locations, abiding by state and district law/policy.</i>	<i>Ongoing</i>

Standard Software Configurations

Configuration:	K-12		
Locations/Users:	Office/Classroom/Lab/Library		
Software Type	Standard Package/Program	Distribution (file server, hard drive, CD ROM, etc)	Notes

Vision and Strategy for Connectivity

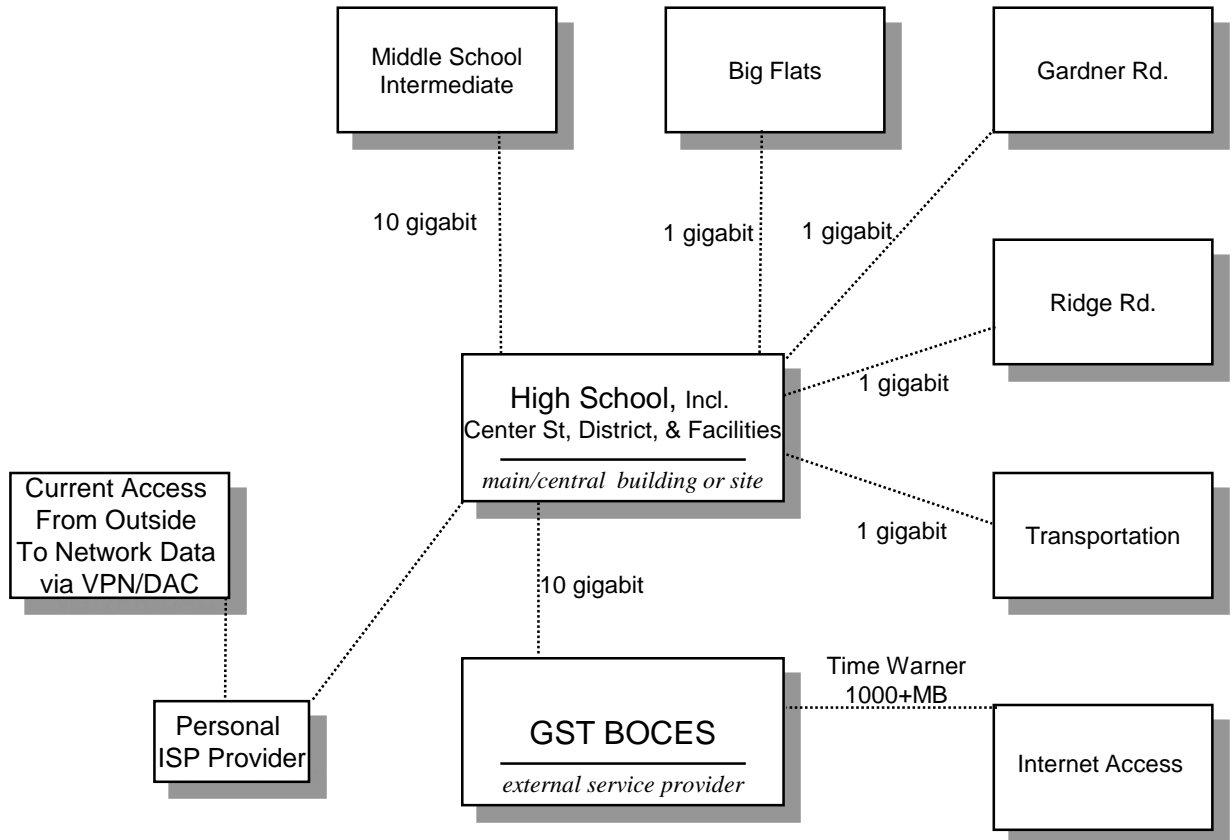

Background	<p>Networked computer capabilities can be greatly enhanced by connecting them to local and wide area networks, on-line services, web based systems via the Internet.</p> <p>This section describes preferred access to connectivity along with specifications for associated network wiring, hardware, and software.</p>	
Present State & Trends	<p><i>There is network in every classroom, office, and meeting area. The network is leveraged to provide access for data, phone, CATV, and video. Special distance learning connectivity is available in two District multimedia rooms. All district infrastructure will be upgraded by Summer 2019.</i></p>	
Preferred Future	<p><i>Fast, reliable, secure access from all locations to needed applications. Convergence of most technologies onto the "network" - wired & wireless computer access, phone, HVAC, security, camera, CATV, video, video conference, and live on-site broadcast. Ability to support any feasible number of devices, to include 1:1 or higher ratios with students and the possibility of personally owned computing devices. Support all hi-density device initiatives, including CBT and online assessment.</i></p>	
Strategy for Change	<p><i>Upgrade switching, wireless access points, server infrastructure, cabling backbone, and Internet bandwidth to accommodate growth and new technology. Participate in regional planning regarding long-term hi-speed data circuits. Increase wireless laptop and tablet use. Develop effective wireless configurations and management. Begin discussing 1:1 student access strategies. Implement all capital projects to support all identified infrastructure needs.</i></p>	
	Key Objective	Target Date:
	<small>(specific, achievable, scheduled, and delegated)</small>	
	<p><i>Expand efforts and perform necessary upgrades as budgets permit. Continue discussions on obtaining long-term network upgrades to accommodate convergence of all technologies in our preferred future, keeping in mind the District's 2030 "Building Our Future Now" initiative.</i></p>	Ongoing

Connectivity Overview

MEDIUM	SYSTEM / APPROACH	CURRENT STATUS
Data Networks	Switched 10/100/1000/10000 Ethernet, 10 Gigabit backbone internal & external. Powered switches for Wireless Access Points. "AC" wireless Ethernet.	Backbone upgrades complete by summer 2019. Upgrading CISCO switching equipment to offer full 1GB bandwidth to the desktop.
Telephone	Hybrid district-wide system using Building PBX and IP inter-building connectivity.	Upgrade to VoIP will be complete by summer 2019. Review all Verizon, Centrex, and FirstLight services for best pricing, quality service, E-Rate compliance, and BOCES service opportunities.
Television	Cable TV, 16 channels via IP using Safari Montage. Video and sound delivered through interactive whiteboards and projectors.	Internal stations used for information distribution for and by staff and students. Cable signals used with Interactive white boards.
Video Conferencing	IP based access through special systems in HS MMC and MS LGI. Skype connectivity is part of operating system on Windows computers. IP access via the Internet from GST BOCES services.	Video conferencing available from all networked computers via Skype.
<p><u>Connectivity Standards</u></p> <p>Interoperability: Connectivity systems and associated equipment will allow for the simultaneous use of different types of hardware from a variety of different vendors. Standardization where possible.</p> <p>Scalability: Connectivity systems will be designed to accommodate increased usage, either from the same user population demanding a higher level or services, or through a greatly expanded user population, with no fundamental change to newest architecture.</p> <p>Security: Connectivity systems will guard against unauthorized access (accidental and deliberate) to information and network resources including wireless technology.</p> <p>Reliability: Connectivity systems will be designed to minimize "down-time" and the associated disruptions to instructional and administrative activities. Includes bi-monthly scheduled maintenance.</p> <p>Industry Standards: Connectivity systems will be designed, installed, and tested in accordance with minimum requirements specified by appropriate ANSI/TIA/EIA guidelines.</p> <p>The following people will work to ensure compliance with these standards:</p>		
Technical Designer:	Hunt Engineering / Technology Director, District staff / GST BOCES	
Design Reviewer:	Hunt Engineering / Technology Director, District staff / GST BOCES	
Post-Installation Tester:	Hunt Engineering / Technology Director, District staff / GST BOCES	

Inter-Building Connections

Medium: Data - Existing - STN Fiber Network
 (eg. data, telephone, distance learning, cable TV)

System Description:

Use portion of Intra-building gigabit backbone to support phone system traffic between buildings. This will be replaced by VoIP implementation summer 2019.

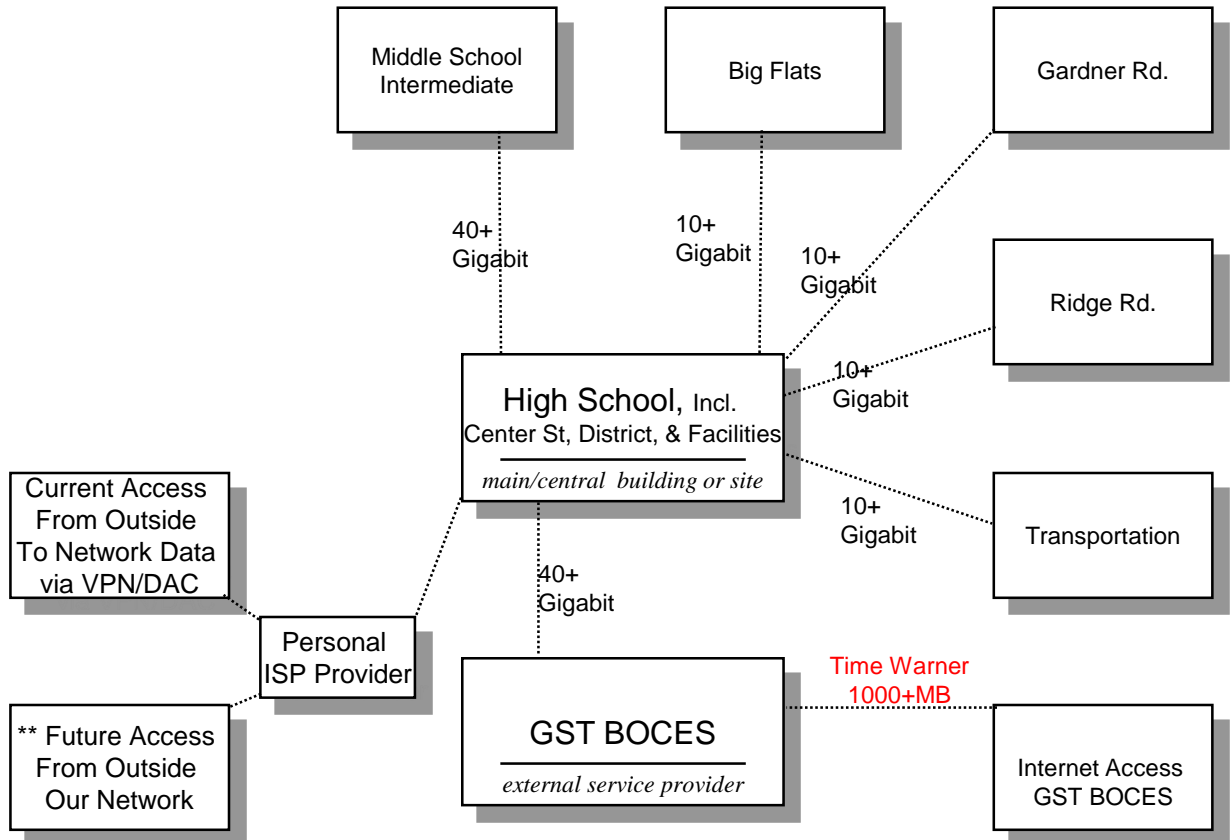

Content Keeper used to filter Internet.

Inter-Building Connections

Medium: Data – Planned (With STN Network Backbone)

(Wired, Wireless, Phone, HVAC, Security, CATV, Video, Video Conference, Live Broadcast)

(Dependent on Capital Project Implementation)

System Description:

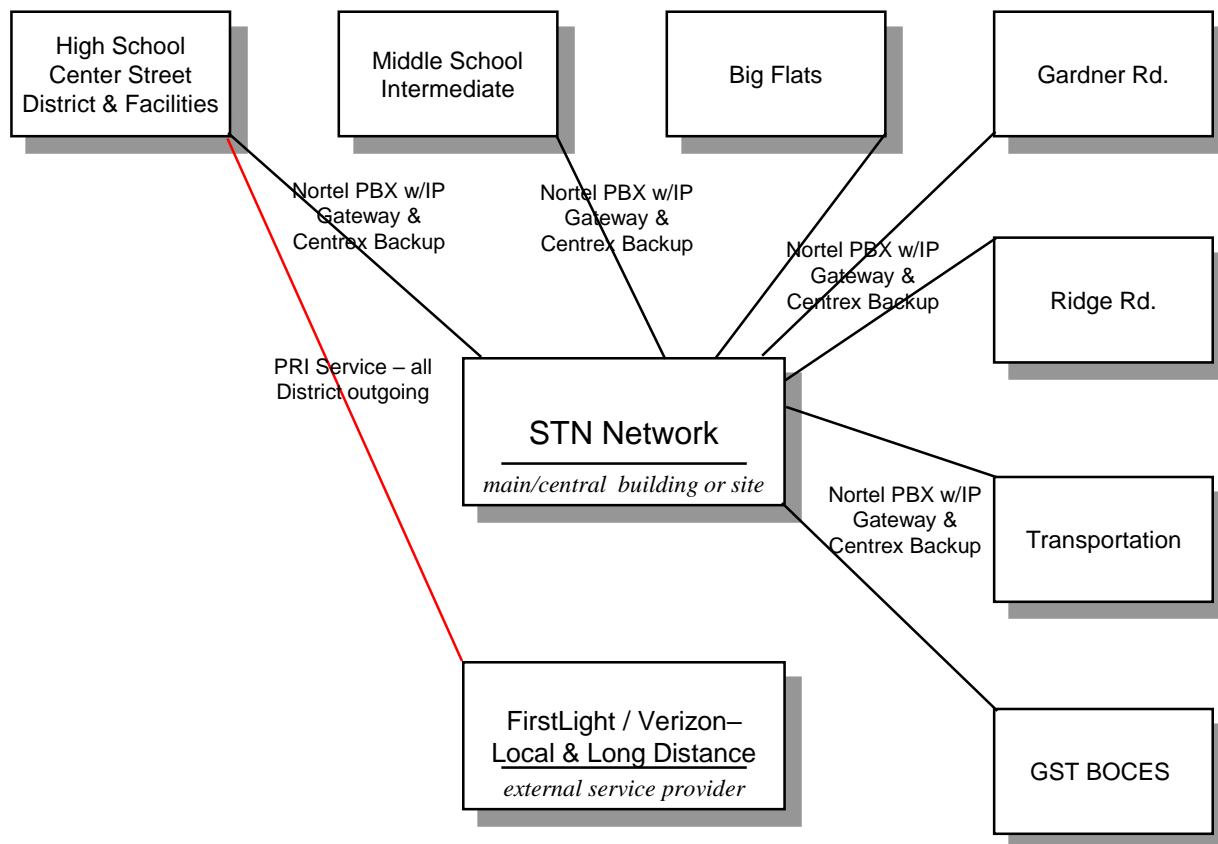

Content Keeper used to filter Internet.

•The connections between buildings are via STN Fiber circuits for 10 years thru July 2022. STN is dark fiber so we are not limited to the data speed it can carry. It will be determined by the edge equipment we can introduce.

** Future implementation to permit flexibility in accessing applications serviced by GST BOCES. This could include instructional programs, personal and shared storage resources, and secure/filtered Internet access.

Inter-Building Connections

Medium: Telephone - Existing
 (eg. data, telephone, distance learning, cable TV)

System Description:

Internal Calls and Voicemail:

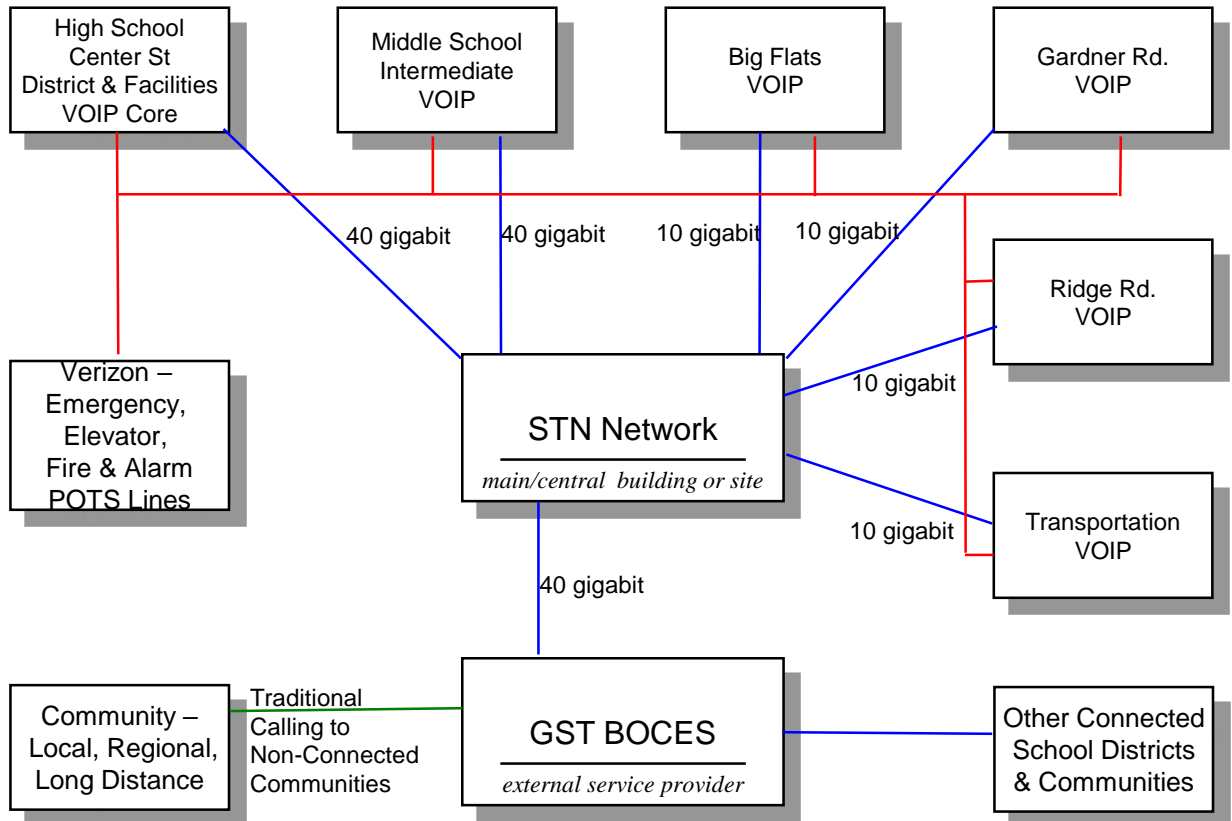

Each building has a dedicated Nortel PBX controlling intra-building traffic. Calls between buildings and voicemail are serviced via the data network using IP gateway cards in the building PBX's. All calls flow the High School's centralized equipment.

Calls Outside the District:

Calls outside the district also flow through the High School's centralized equipment and then to FirstLight using a PRI service. In the event the network is down, each building possesses Verizon CENTREX phone lines which permit calls to continue in and out of each building. Four digit extension dialing and voicemail are disrupted, but seven digit dialing still permits calls between buildings. An auto-attendant is used to manage calls coming into the District. Nearly all staff have voicemail. For teaching staff, voicemail extensions are separate from classroom extensions. An email is sent to staff when they have received a voicemail as a reminder to check. District-wide Caller ID has been researched and for now is on hold due to additional cost.

Inter-Building Connections

Medium: Telephone – Planned
 (eg. data, telephone, distance learning, cable TV)

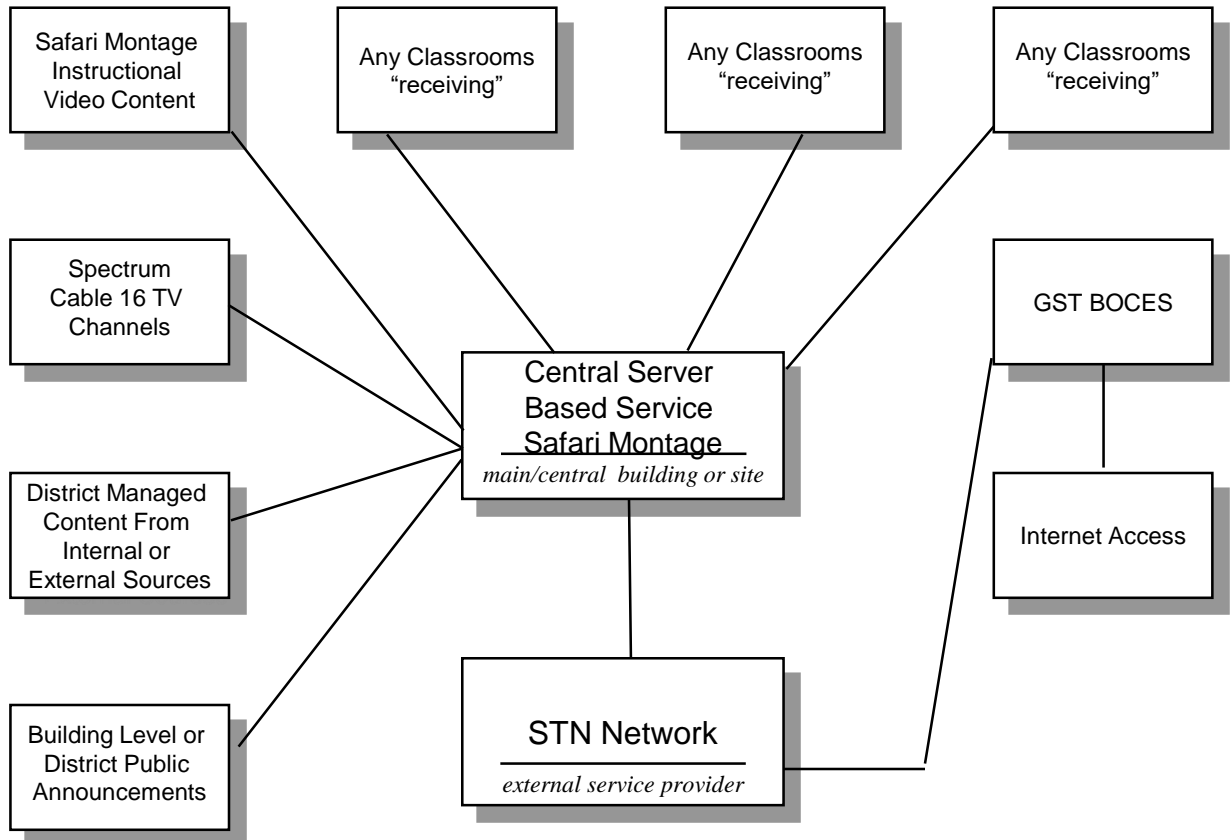

System Description:

The current phone system will be replaced by summer 2019 through capital project funding to the regional VoIP system. All services that can generate E-Rate discounts or BOCES aid will be pursued. Support will be maintained through GST BOCES. The District will leverage the additional features offered through a VoIP system to enhance communications and safety.

Inter-Building Connections

Medium: Media Distribution (incl. Cable) - Existing

(eg. data, telephone, distance learning, cable TV)

System Description:

Video Streaming:

Instructional video streaming content for teaching staff is available through Safari Montage. Also, live building feeds, and district created content are available through Safari Montage. Safari Montage requires an annual subscription which is coordinated through GST BOCES CoSer 512.

Intra-Building Networks

Existing – Elementary by summer 2019

STN
remote site / source

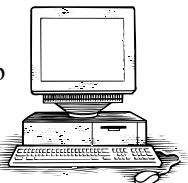

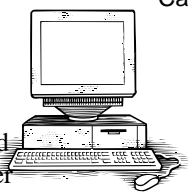

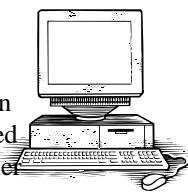

Building/Network:

All Buildings

10/40 Gigabit

(Dependent on Capital Project Implementation)

Vision and Strategy for Policy

Background	<p>Technology requires a unique set of policies & formal procedures to ensure that it is properly purchased & maintained, equitably accessible, appropriately safeguarded, and responsibly used. Of course, policy is only effective where it is understood and implemented. This section reviews the content and effectiveness of existing policies & formal procedures and assesses the need for modifications and additions.</p>	
Present State & Trends	<p><i>Recently revised Board of Education policies, regulations, and exhibits are currently posted on the District's Intranet and through the electronic online Board of Education system, BoardDocs. Most, but not all, policies and regulations are reviewed on an annual basis.</i></p>	
Preferred Future	<p><i>Technology policies are reviewed on an annual basis. Emphasis is given to those policies regarding the safekeeping of "sensitive" student and staff data, particularly "sensitive" data residing at vendor sites. Any changes are communicated to all staff. Recommendations from Auditors are taken into account.</i></p>	
Strategy for Change	<p><i>Technology policies are reviewed each year and suggested changes are communicated to appropriate staff.</i></p>	
Key Objective		Target Date:
<p><i>Refine policies as needed given introduction of newly requested technologies, capabilities, accesses, State requirements, and recommendations from Auditors.</i></p>		<p><i>Ongoing</i></p>

Policy Record

POLICY / PROCEDURE / REGULATION	STATUS	REFERENCE LOCATION	TOPICS COVERED
Authorized Use of School Equipment*	Current	BOE 8330	Private use of school materials
Authorized Use of School Equipment by District Residents*	Current	BOE 8330.1	Public use of school materials

Vision and Strategy for Support

Background	<p>Technology is largely ineffective without an adequate and properly trained support staff. Technology responsibilities that must be handled include planning, designing, purchasing, installing, maintaining, troubleshooting, training, assessment, and more. This section charts how these responsibilities are assigned presently and identifies changes that will be made.</p>	
Present State & Trends	<p><i>9 Staff, 7.3 FTE - Technology Director (Reporting to Assistant Superintendent), Instructional Technology Support Specialists (District and BOCES), Network Technicians (BOCES). Access to many other regional services (BOCES).</i></p>	
Preferred Future	<p><i>A support structure will exist that can meet the instructional and technical needs of all users in a timely manner.</i></p>	
Strategy for Change	<p><i>Annually evaluate current conditions and service needs to make recommendations for the future. This would include district level support and in-building support.</i></p>	
	Key Objective	Target Date:
	<p><i>Analyze changing needs for technical and instructional support relative to growth in technology integration and district or building initiatives. Promote HELPDESK utilization: 795-5324, Email HelpDesk@ , & Online Technical Support Form.</i></p>	<p><i>Ongoing</i></p>

Vision and Strategy for Communication and Cooperation

Background	<p>As in most endeavors, communication and cooperation are critical to the successful integration of technology into teaching and learning. All stakeholders, including faculty, staff, students, parents, boards of education, and other community members must be kept reasonably well informed about plans, opportunities, and developments. Meanwhile, collaborative opportunities often exist with other schools, agencies, corporations, etc. These can help leverage technology investments and provide additional funding and/or support. This section describes present and planned communications and cooperative efforts related to technology and this plan.</p>	
Present State & Trends	<p><i>There is a wide range of avenues for communication. We cooperate with a wide variety of organizations. Concerted effort is made to keep communications up-to-date.</i></p>	
Preferred Future	<p><i>We communicate regularly with all stakeholders. Appropriate technology is utilized to facilitate communication whenever possible. Explore new methods of communication that leverage technology assets and reach a larger community audience.</i></p>	
Strategy for Change	<p><i>Review current methods of communication and provide mechanisms to include all key stakeholders. Incorporate District 2030 "Building Our Future Now" initiative efforts. A strategic team called the Community Engagement/Relations Action Team will be vital as we spearhead this growth.</i></p>	
	Key Objective	Target Date:
	<p><i>Expand current methods of communication where useful. Implement new methods of appropriate internal and external communication.</i></p>	<p><i>Ongoing</i></p>

External Cooperation

(Technology-Related)

Name of Organization	Present Level of Cooperation	Notes / Preferred Cooperation
<i>Administrative Combined Services</i>	<i>Shared Food Service Director.</i>	<i>Program continues.</i>
<i>BOCES Services</i>	<i>Participate in many shared services with other school districts.</i>	<i>Services continue.</i>
<i>CCC</i>	<i>Advanced coursework for college credit.</i>	<i>Program continues.</i>
<i>CCC</i>	<i>Solidworks application Pre-Engineering program.</i>	<i>Program continues.</i>
<i>Computer Lending Program - Parochial</i>	<i>Specific hardware and software loaned to Horseheads Saint Mary Our Mother, Horseheads Christian School, and Montessori.</i>	<i>Continue as requested.</i>
<i>CrowdFiber</i>	<i>Initiative dedicated to bringing High Speed Bandwidth to remote locations within Chemung County and Horseheads boundaries specifically.</i>	<i>Currently being researched.</i>
<i>Elmira Heights / Horseheads - Transportation</i>	<i>Combined busing services.</i>	<i>Services continue.</i>

External Cooperation

(Technology-Related)

Name of Organization	Present Level of Cooperation	Notes / Preferred Cooperation
<i>GST BOCES</i>	<i>Service / Support provider District-wide</i>	<i>Services continue.</i>
<i>High Tech High School, STEM</i>	<i>Create a 4 year technical high school program that prepares students for a successful transition into advanced post secondary STEM (science, technology, engineering, math) study or entrance into local STEM workforce.</i>	<i>Continue research, Continue GST BOCES Program.</i>
<i>Local Law Enforcement</i>	<i>Safety resource officer in the High School and Middle School.</i>	<i>Program continues. Access to all appropriate network resources.</i>
<i>NYSCATE</i>	<i>State Conference for Instructional Technology.</i>	<i>Program continues.</i>
<i>Pre-K</i>	<i>Big Flats, Center Street, Gardner Road, and Ridge Rd.. Collaborate on program for four-year olds. State grant funds collaboration with Ungvarsky Daycare.</i>	<i>Desire to expand as need increases. Continue as funding allows.</i>
<i>Regional (County) Technology Infrastructure Planning</i>	<i>Access to county-wide dark fiber project to provide unlimited bandwidth to all school facilities in Elmira, Elmira Heights, and Horseheads Districts.</i>	<i>Completed and implemented. Has replaced Verizon circuits.</i>
<i>Regional District Instructional Technology Planning</i>	<i>Made up of Technology Directors to discuss similar needs with regard to many areas: infrastructure, 21st century learning skills, best practices, new technology, new staff development concepts, and regional impact for federal and state dollars.</i>	<i>Meet monthly thru GST BOCES.</i>

External Cooperation (Technology-Related)

Name of Organization	Present Level of Cooperation	Notes / Preferred Cooperation
<i>Spectrum Services</i>	<i>Provide digital access to TV Channels.</i>	<i>Continuing.</i>
<i>Summer Cohesion</i>	<i>Use available school facilities for summer programming ages 4 - 12.</i>	<i>Program continues.</i>
<i>Summer School</i>	<i>Summer program designed to provide course completion not completed during school year.</i>	<i>Program continues. Usually held in High School or Middle School.</i>
<i>Summer Science Institute (Elmira/Horseheads)</i>	<i>Summer program designed to enrich the middle level science program. Classroom computers, computer lab, and multimedia center utilized.</i>	<i>Program continues.</i>
<i>Village of Horseheads</i>	<i>Joint Fueling Station - District & Village</i>	<i>Currently operational.</i>

Vision and Strategy for Funding

Background	<p>To enable technology to effectively improve teaching and learning, adequate resources must be allocated on a regular basis. Funds are needed for capital costs such as hardware & software acquisition & installation. However, industry standards estimate that these up-front costs represent only 30% of the life-cycle cost of technology. Substantial funds are also needed to cover operating costs such as ongoing training, upkeep, support, consumables, upgrades, connectivity fees, etc. While recognizing the inherent uncertainties of forecasting technology costs, this section projects technology-related costs by year and identifies appropriate funding sources. It will be kept as accurate as possible through periodic updates.</p>	
Present State & Trends	<p><i>Funding is gradually being restored from previous years of reduction but has not been fully restored from previous peak years. Current demands are not being completely met by extending the replacement cycle and forgoing some new requests. Spending practices maximize alternative sources such as BOCES, State, Federal monies, and Capital Project Aid.</i></p>	
Preferred Future	<p><i>Funding sources continue to meet all District needs over a shorter period of time. Capital Project funding is provided to deal with systemic improvement to deliver required access and content, particularly infrastructure and widely used classroom display technology. Annual funding streams, apart from any capital project, can be increased and sustained to support large scale initiatives of new technology while maintaining a sufficient replacement program.</i></p>	
Strategy for Change	<p><i>Leverage state and federal programs such as BOCES aid, capital construction, Title II grants, and telecommunications discounts (E-Rate) to provide maximum funding. Pursue and implement technology specific capital project funding. Gradually increase local funding to previous year peak levels through voter approval. Funding and corresponding implementation strategy are reviewed annually and revised as needed to support identified needs. Evaluate systems options that can promote increased performance and longer retention of technology.</i></p>	
	Key Objective <small>(specific, achievable, scheduled, and delegated)</small>	Target Date:
	<p><i>Maintain and maximize local and non-local share funding including E-rate. Consider replacement strategies based on individual user needs and new technology requests based on instructionally driven rationale & standardized evaluation.</i></p>	Ongoing

Annual Operating Costs

	Notes / Assumptions	Cost Estimate
PERSONNEL	9 Staff, 7.3 FTE - Technology Director (Reporting to Assistant Superintendent), Instructional Technology Support Specialists (District and BOCES), Network Technicians (BOCES). Access to many other regional services (BOCES).	\$749,690
STAFF DEVELOPMENT	In-Service, Substitutes, Staff Development	\$183,487
HARDWARE UPKEEP & UPGRADES	See Technology Implementation Schedule	\$340,941
SOFTWARE ADDITIONS & UPGRADES	See Technology Implementation Schedule	\$59,895
CONSUMABLE MATERIALS	Paper, Printer Cartridges - used district-wide 0450 budget code allocation and separate code for copier/printer paper where available. May be used for other purchases also.	\$200,000
CONNECTIVITY FEES	See Technology Implementation Schedule Under District - BOCES Section	\$42,108
E-Rate	E-rate applications are made annually and are not guaranteed. The funds are expended to supplement the local budget where a shortfall would occur due to the specific need of a building or buildings.	-\$20,000
NOTE:	There are additional salary/materials costs associated with BOCES Computer Center staff. These staff provide services to the region whereas the Personnel costs above are directly charged to Horseheads. See CSC and ISC budgets.	
ESTIMATED TOTAL ANNUAL OPERATING COST:		\$1,556,121

Estimated Technology Implementation Schedule Base Year Plus 5 Years - 2018-2019 Thru 2023-2024																		J-3 Worksheet

Using Technology
Request Form

Technology Request Evaluation

Staff, Building, and Room: _____

If a *Replacement* Request: What replacement is needed and why?

All other Requests:

1. What is the technology desired? Please provide details and costs.
2. What experiences have you had that brought about this request?
3. How will the technology be used by the students?
4. How will the technology be used by the teacher - to collaborate – teacher to teacher, teacher to students, student to student, or within department or grade level?
5. How will the technology affect/enhance student performance?
6. What technology benchmarks and NYS Learning Standards would this technology address in your curriculum map?
7. Please describe training scenarios in which you have participated or will participate in if you are unfamiliar with the technology being requested.
8. How do you plan to share and encourage the use of this technology in the district?

Staff Signature: _____ Date: _____

Principal Approval: _____ Date: _____

District Approval: _____ Date: _____

Additional Information

Please contact Gregg Moyer if you require assistance with pricing information not provided in the budget guide or if you have questions. See budget guide on the Intranet entitled “Technology Request Form Suggested Budget Amounts.”

If you need help developing your instructional technology request strategy, please contact one of the Instructional Technology Support Staff (Dave Mayotte, Cheryl Tice, Matt Middlebrook)

Vision and Strategy for Implementation

Background	<p>Monitoring progress improves the likelihood of successful implementation of a plan. This is often accomplished by technology driven participation in relevant District planning committees. Because of the plethora of technical issues and details, implementation of a technology plan requires an organized yet flexible approach.</p> <p>This section contains implementation tracking tools such as identification of critical committees and groups, a multi-year timeline, a calendar of tasks & events, and a key objectives report card.</p>	
Present State & Trends	<p style="text-align: center;"><i>Previous District Technology Committees met separately, annually, for review and updating of the plan. They were not totally effective as their makeup was unpredictable and often did not include the correct staff for making key decisions on curriculum, staff development and funding. Participation in the recently structured District 2030 "Building Our Future Now" initiative offers an alternative process.</i></p>	
Preferred Future	<p style="text-align: center;"><i>The Technology Plan is modified through the lens of key decision-making groups; namely the four 2030 Engagement Action Teams, Administrative leadership teams, and teacher focused department groups which include the full PK-12 spectrum. Sub-committees or off-shoot groups are only created where absolutely necessary to complete research for a particular task. The key is to avoid a group attempting to make decisions in a technology silo and that lack the authority to implement the changes that are identified.</i></p>	
Strategy for Change	<p style="text-align: center;"><i>Implement the inclusion of a voice in all relevant groups with technology integration as a focus in curriculum and staff development changes. This includes instructional technology expertise and technical support expertise relative to key short-term key objectives and long-term strategies.</i></p>	
	Key Objective <small>(specific, achievable, scheduled, and delegated)</small>	Target Date:
	<p><i>Align vision and strategy with District 2030 "Building Our Future Now" initiative beginning with the first Strategic 2030 Engagement Action Team on Curriculum, Instruction, and Assessment.</i></p>	<p><i>Ongoing</i></p>

Implementation Report Card

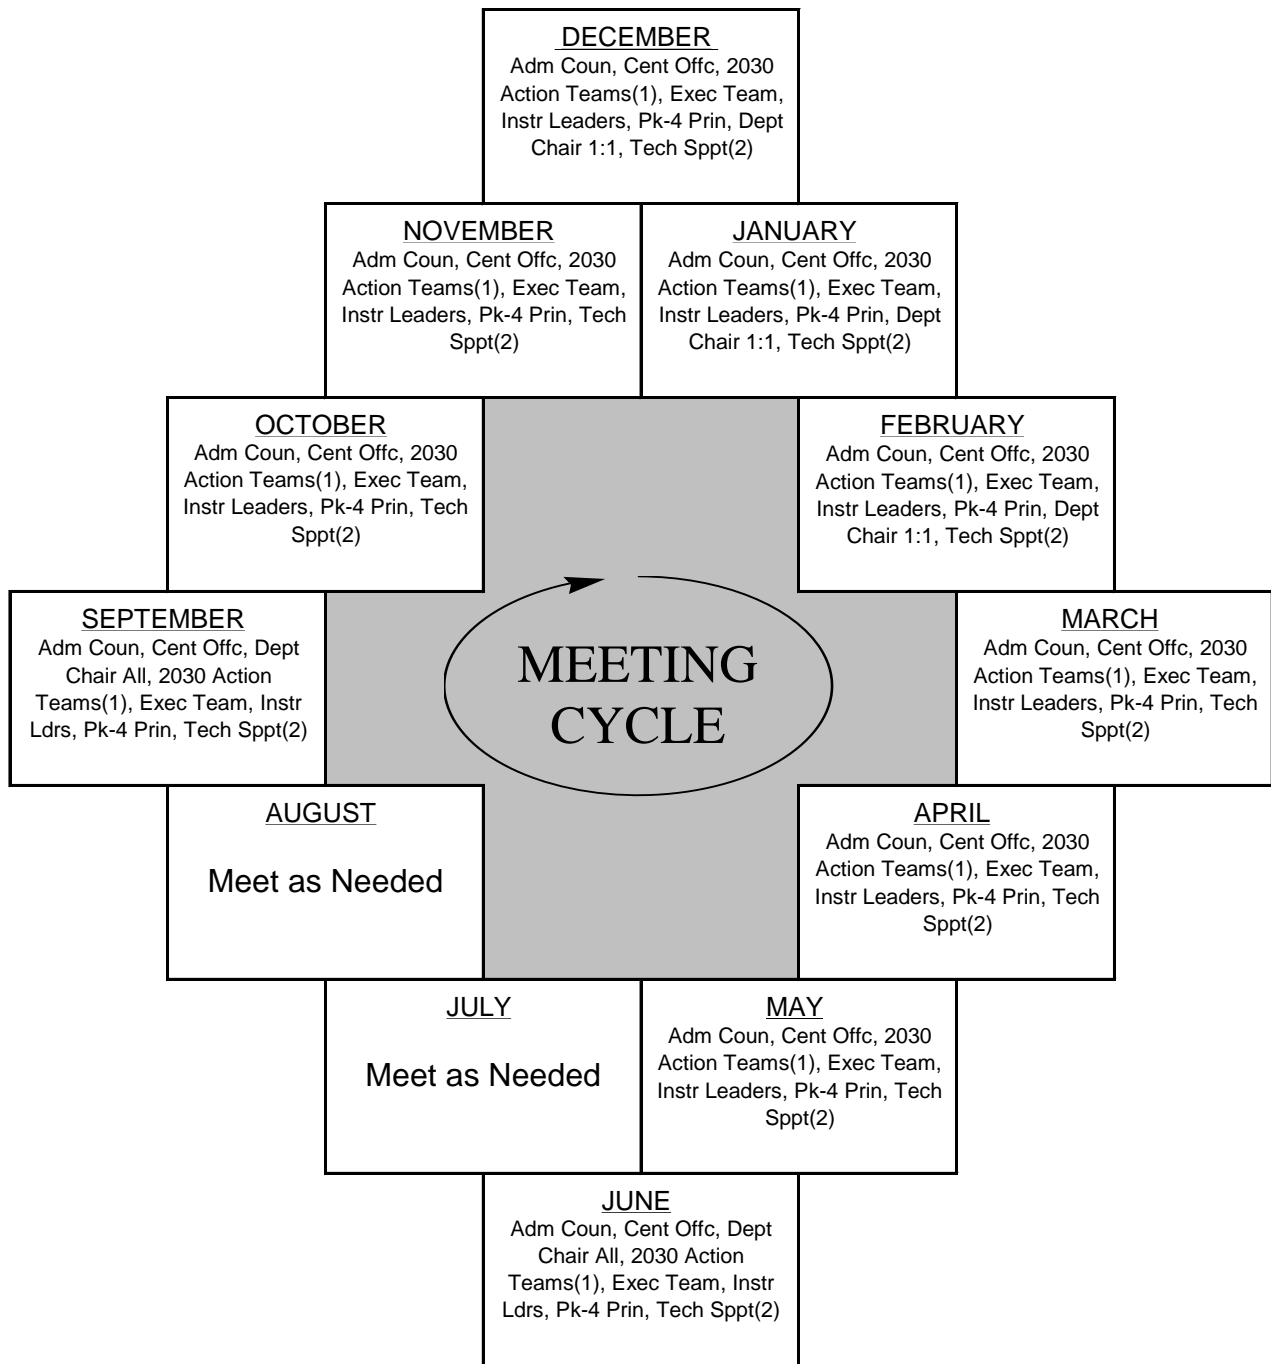

Section of Plan	Key Objective	Target Date	Responsible Person or Group	Current Status
A	Continue to be integral in the district process of change and ensure the inclusion of technology benchmarks and technology integration in all levels of teaching.	Ongoing	2030 Engagement Team, Curr, Instr, & Assess.	Work in progress
B	Provide training opportunities for all staff. Customize training wherever possible. Critically explore additional online staff development models.	Ongoing	2030 Engagement Team, Prof. Learning	Work in progress
C	Refine implementation of new and replacement technology using request form, frequent review of usage data, classroom visitation, and budget accountability.	Ongoing	Gregg Moyer	Work in progress
D	Refine implementation of new and replacement technology using request form, frequent review of usage data, classroom visitation, and budget accountability.	Ongoing	Gregg Moyer	Work in progress
E	Utilize existing department or building groups to emphasize information sharing on software needs and purchases. Continue to look at software options on a multi-building or district-wide basis. Ensure secure access to data from outside locations, abiding by state and district law/policy.	Ongoing	Gregg Moyer	Work in progress
F	Expand efforts and perform necessary upgrades as budgets permit. Continue discussions on obtaining long-term network upgrades to accommodate convergence of all technologies in our preferred future, keeping in mind the District's 2030 "Building Our Future Now" initiative.	Ongoing	Gregg Moyer, GST BOCES, Hunt Eng.	Work in progress
G	Refine policies as needed given introduction of newly requested technologies, capabilities, accesses, State requirements, and recommendations from Auditors.	Ongoing	Megan Collins, HR Director	Work in progress
H	Analyze changing needs for technical and instructional support relative to growth in technology integration and district or building initiatives. Promote HELPDESK utilization: 795-5324, Email HelpDesk@ , & Online Technical Support Form.	Ongoing	Gregg Moyer, Anthony Gill, Katy Buzzetti, Tom Douglas	Work in progress

Implementation Report Card

I	Expand current methods of communication where useful. Implement new methods of appropriate internal and external communication.	Ongoing	Gregg Moyer, Susan Pirozzolo, Anthony Gill, Instruct Tech. Specialists	Work in progress
J	Maintain and maximize local and non-local share funding including E-rate. Consider replacement strategies based on individual user needs and new technology requests based on instructionally driven rationale & standardized evaluation.	Ongoing	Gregg Moyer, Katy Buzzetti, Anthony Gill, Tom Douglas	Work in progress
K	Align vision and strategy with District 2030 "Building Our Future Now" initiative beginning with the first Strategic 2030 Engagement Action Team on Curriculum, Instruction, and Assessment.	Ongoing	Gregg Moyer, Anthony Gill, Tiffany Owen	Work in progress
L	Work with District Action Teams that develop curriculum and student assessments to integrate technology.	Ongoing	Gregg Moyer, Anthony Gill, Tiffany Owen	Work in progress

Meeting Cycles

Number in parentheses indicates number of meeting times per month for those groups listed before. Electronic meetings/discussion boards will support this meeting schedule.

Vision and Strategy for Assessment

Background	<p>This technology plan is successful if it helps the district accomplish its mission. Unfortunately, measuring progress towards the mission and correlating it with some or all of the specific actions in this plan is difficult at best. However, attempting to assess such progress is the key to learning and growth, and result-oriented feedback is the primary requisite for making technology planning a process. A variety of methods can be used to assess knowledge and performance outcomes, such as monitoring specific results within standardized tests, building a portfolio of authentic works, tracking trends in periodic surveys, and so on. This section contains evidence of results in terms of staff and student outcomes.</p>	
Present State & Trends	<p><i>Many students are gradually improving limited technology skills and knowledge yet improvements must be made to acquire 21st Century Learning Fluencies and Common Core Standards attainment.</i></p>	
Preferred Future	<p><i>Simple indicators are used to provide feedback as students and teachers develop technology proficiencies. This will be influenced by regulation from the state regarding staff evaluation, required performance indicators, and mandated online testing such as NYS CBT (Computer Based Testing). All staff need to embrace expanding student technology skills.</i></p>	
Strategy for Change	<p><i>Develop key indicators of student and staff technological knowledge and skills and begin monitoring trends. Share local initiatives at BOE meetings. Utilize District 2030 Action teams as means to review and modify these proficiencies (Professional Learning and Curriculum, Instruction, and Assessment Action Teams).</i></p>	
Key Objective		Target Date:
<p><i>(specific, achievable, scheduled, and delegated)</i></p>		
	<p><i>Work with District Action Teams that develop curriculum and student assessments to integrate technology.</i></p>	<p><i>Ongoing</i></p>

DistrictVISTA Rubric for Assessing Educational Technology Plans

District/Organization: Horseheads Central Schools

Assessment Results		Date of Assessment					Assessment Score <i>(see attached rubric)</i>
		Jun '18	Jun '19	Jun '20	Jun '21	Jun '22	
Components of a Technology Plan							
Summary		2.75					
A. Student Outcomes		2.5					
B. Staff Development		2.5					
C. Workstation Access		3					
D. Peripheral Access		3					
E. Software & Data Access		3					
F. Connectivity		3					
G. Policies		2.5					
H. Support		2.5					
I. Communication & Cooperation		3					
J. Funding		2.75					
K. Implementation		2.75					
L. Assessment		2.5					
Sum:		35.75	0	0	0	0	0

Section of Plan →	Summary <i>(Vision + Strategy)</i>
3 "detailed design"	The plan includes a <u>specific, comprehensive vision</u> covering all areas from student outcomes to assessment; and a clearly summarized strategy which identifies key objectives and timing.
2 "basic design"	The plan includes a specific vision for at least <u>five of the key areas</u> (see list on this page); and a narrative summary of the strategy for achieving that vision.
1 "general approach"	The plan includes a general vision that identifies the <u>overall philosophy</u> of the organization related to education and technology.
0 not included	The plan does not specifically present a vision of the future or a strategy for getting to that vision.

DistrictViSTA Rubric
for Assessing Educational Technology Plans

Section of Plan →	A. Student Outcomes	B. Staff Development	C. Workstation Access	D. Peripheral Access
3 <i>"detailed design"</i>	The plan identifies specific student outcomes by grade/department and the process to be used to ensure technology integration into the curriculum on an ongoing basis to achieve these outcomes.	The plan contains <u>detailed descriptions</u> of staff development such as models, methods, training providers, training resources, workshop schedules, and/or staff proficiency standards.	The plan contains a detailed computer workstation inventory, and identifies all projected requirements, along with detailed specifications & standards, and a strategy for platform compatibility and obsolescence.	The plan contains a detailed inventory of peripherals, and identifies all projected requirements, along with detailed specifications.
2 <i>"basic design"</i>	The plan identifies a basic set of technology-related student outcomes.	The plan outlines the <u>basic staff development model and methods</u> (e.g. workshops every Wednesday afternoon based on annual survey of needs).	The plan estimates the present inventory of computer workstations, projects total future needs, and identifies purchases planned over the next 2-4 years.	The plan estimates the present inventory of peripherals, projects total future needs, and identifies purchases planned over the next 2-4 years.
1 <i>"general approach"</i>	The plan describes the general approach to be used for identifying and communicating desired student outcomes related to technology.	The plan describes the <u>basic scope</u> of the staff development program, such as by identifying the overall budget and primary training provider.	The plan identifies computer purchases planned for the next 1-2 years.	The plan identifies peripheral purchases planned for the next 1-2 years.
0 <i>not included</i>	The plan does not specifically address student outcomes.	The plan does not specifically address staff development.	The plan does not address workstation access.	The plan does not specifically address peripheral access.

DistrictViSTA Rubric
for Assessing Educational Technology Plans

Section of Plan →	E. Software & Data Access	F. Connectivity	G. Policies	H. Support
3 <i>"detailed design"</i>	In addition to the items below, the plan specifically addresses software standards, site licenses, database access needs, and software installation & data back-up procedures.	The plan contains <u>detailed network specifications</u> such as wire types, routing, and connection points; network protocol, hardware, & software; capital and recurring costs; and security measures.	A detailed set of technology-related policies & procedures <u>have been (or will soon be) developed</u> , approved, communicated, and implemented; and they will be periodically reviewed.	The plan contains detailed job descriptions, actions, and scheduling to meet personnel and support process improvement objectives.
2 <i>"basic design"</i>	The plan contains a list of existing software & data packages, and it outlines the general approach to providing increased access to software & data.	The plan describes the <u>basic network design</u> in terms of bandwidth capacity, network operating system, basic network architecture, # of drops in a typical room, and an estimate of the specific costs & schedule.	Existing policies & procedures <u>have been reviewed</u> , and a list of necessary additions & modifications is contained in the plan along with an update schedule and responsible person(s).	The plan identifies the need for additional personnel and charts the responsibilities of existing and future staff. It also identifies how support processes need to be improved.
1 <i>"general approach"</i>	The plan identifies software purchases planned for the next 1-2 years.	The plan identifies the buildings & areas to be connected and includes a rough cost & schedule estimate.	Existing policies & procedures are <u>listed</u> and/or contained in the plan; and responsibility for policy has been assigned to a specific person or group.	The plan identifies the general needs for support processes and personnel, such as how many staff positions are needed.
0 <i>not included</i>	The plan does not specifically address software & data access.	The plan does not specifically address connectivity.	The plan does not specifically address policies & procedures.	The plan does not specifically address support personnel & processes.

DistrictViSTA Rubric
for Assessing Educational Technology Plans

Section of Plan →	I. Communication & Cooperation	J. Funding	K. Implementation	L. Assessment
3 <i>"detailed design"</i>	The plan contains detailed actions and schedules for meeting communications objectives and for strengthening cooperative relationships with external organizations.	The plan lists all capital and annual costs for hardware, software, and support; and the plan identifies specific, real funding sources which are equal to the total costs.	The plan includes a detailed timeline and list of scheduled & delegated actions. It also includes detailed procedures for implementing, monitoring, and adjusting the plan, and reports progress toward key objectives.	The plan charts long-term trends in technology-related student & staff outcomes, and it identifies specific areas for improvement based on these results.
2 <i>"basic design"</i>	The plan lists present & planned media used to communicate with key stakeholders as well as present & planned cooperative efforts and relationships with external organizations.	The plan estimates capital and annual costs and shows possible funding sources that are equal to the total costs.	The plan contains an overall technology timeline and identifies the ongoing process to be used to implement, monitor and adjust the plan.	The plan identifies specific tools for assessing student & staff outcomes related to technology.
1 <i>"general approach"</i>	The plan identifies the general approach for communicating with stakeholders and cooperating with other schools, agencies, corporations, etc.	The plan estimates capital and annual costs and lists possible funding sources.	The plan lists objectives and delegated actions.	The plan identifies a general approach for assessing technology-related outcomes.
0 <i>not included</i>	The plan does not specifically address communication & cooperation.	The plan does not specifically address costs and funding sources.	The plan does not contain specific implementation actions or timelines.	The plan does not specifically address assessment of teaching & learning outcomes.
