Progress Reports / Report Cards

Parents are informed of student progress in two ways. Progress reports are sent home with students at the five-week point of each marking period. A report card is sent home with students at the end of the ten-week marking period. We encourage parents to sign-up for Parent Portal to help keep track of your student's progress between the reporting periods.

Distinguished High Honor Roll 95-100
High Honor Roll 90-94.99
Honor Roll 85-89.99
Failing Grade 64.0 or lower in any course

February Report Cards will be available to view online beginning February 3 through your Parent Portal account. Copies will be sent home with students. Report cards for 100% remote students will be mailed.

Safety Protocols

Our top priorities are the health, safety, wellbeing, and education of all our students. While we must follow the requirements of health and education agencies, we also have our own protocols we have instituted in order to guard the health and safety of our students and staff.

Monitor your child's health

On the days students attend school, parents/guardians are required to check the student's temperature and monitor for symptoms of COVID-19. Please be mindful of your child's overall health when screening your child in the morning. If your child has a temperature of 100 degrees or higher and/or exhibits other symptoms (including but not limited to cough, shortness of breath/difficulty breathing, fatigue, muscle aches, loss of taste/smell, etc.), please keep your child home. If our screening determines your child has a temperature of 100 degrees or higher and/or symptoms of COVID-19, you will be notified and required to immediately pick up your child.

Please remember to complete the Stay Well survey using the link sent to you each morning on the days your child attends school. The Stay Well survey links are sent to both parents/guardians as listed in our database. If you are not getting these emails or you have questions, please contact your child's school.

Masks

All staff and students are required to wear masks while in school, on the playground, and on buses. Students will be allowed mask breaks when eating and when at least six feet of social distancing is consistently maintained. It is very important that masks are worn correctly; this means covering the nose and below the chin. [Click here for the district mask procedure.](#)

Hand Washing

One of the most effective ways to stop the spread of viruses is washing hands properly and often. Click here for a video on [How to Wash Your Hands.](#)

Returning to school in COVID-19 health-related situations

Please note: This information has been updated using newly-released guidance from the New York State Health Department.

Please also note: The district must follow requirements of the New York State Health Department, the Chemung County Health Department, and the New York State Education Department in regard to safety protocols. The district also has its own additional safety protocols to guard the health and safety of students and staff.

If a student tests positive for COVID-19, here are the requirements to return to school:

1. Release from quarantine by the Health Department:
 - If symptomatic, the student must complete at least ten days of isolation from the onset of symptoms
 - If asymptomatic (no symptoms), the student must complete ten days of quarantine after the positive test

If a student has symptoms of COVID 19, one of the following is required to return to school:

A

1. COVID-19 diagnostic test with negative result, and
2. Improvement of symptoms with child being fever-free without medication for at least 24 hours

OR

B

1. Alternate diagnosis from the child's health care provider

OR

C

1. At least ten days have passed since the date of first symptoms, and
2. Improvement of symptoms, and
3. The child is fever-free without medication for at least 72 hours

If a student is in direct contact with a person who tests positive for COVID-19, the following are required to return to school:

1. Release from quarantine by the Health Department (generally 10 days, but if the direct contact lives with the COVID-19 positive person then the quarantine period starts after the positive person is cleared by the Health Department.)

Volume 4 : Issue 6 - February 2021

This month we focus on Digital Privacy

3 Major Issues Concerning Online Privacy

Source: <http://go.gstric.org/406-issues>

- * **Spying and Snooping** - When you are online, you are spied by a number of trackers which keep a record of your search history and track all your online activities. This provides a clear picture of who you are and your interests. Most of the time, this tracking is for advertisement purposes but sometimes this information is used by cybercriminals.
- * **Information Mishandling** - Some sites on the internet may need personal information to give you access to their services. These sites often store that information in cookies. Most of the time this information is not encrypted and can be accessed by anyone. This mishandling of personal information may lead to serious consequences.
- * **Location Tracking** - Many internet users post their current location along with tagging friends and family members in their social media. It's fun and exciting to share your life events, but this data does not remain restricted to your expected audience only. You are providing data gives first-hand info to the world about where exactly you are and what your next move is, which is certainly risky and insecure.

WHAT IS YOUR REALITY?

What things define the reality of your life? What type(s) of news do you watch? What type(s) of articles do you read? Do you have a limited number of sites that you visit online? Do you always talk to the same people?

All of these things may influence your view of your reality. We know that certain news groups and websites have certain biases. If you use social media it may feed you news and headlines based on your likes. We hear lots of fake news and misleading information. (more on page 4)

5 competencies of digital citizenship

ISTE has made teaching about Digital Citizenship more active by introducing five competencies focused on getting students DOING more to demonstrate DC Values.

INCLUSIVE:

I am open to hearing and respectfully recognizing multiple viewpoints, and I engage with others online with respect and empathy.

INFORMED:

I evaluate the accuracy, perspective, and validity of digital media and social posts.

ENGAGED:

I use technology and digital channels for civic engagement, to solve problems and be a force for good in both physical and virtual communities.

BALANCED:

I make informed decisions about how to prioritize my time and activities online and off.

ALERT:

I am aware of my online actions, and know how to be safe and create safe spaces for others online.

Rethinking Digital Citizenship

Richard Culatta
Chief Executive Officer, ISTE

"Far too often, digital citizenship is taught in a negative way — here's the list of all the stuff you should not do online. And while I appreciate the intent behind anti-cyberbullying campaigns, we don't teach other things as "anti-" in schools. And so we must challenge ourselves to do better."

DEVELOP HABITS TO PROTECT YOURSELF

FROM

FRAUD

- ▶ Improve Your Passwords - use Multi-factor authentication if available.
- ▶ Manage your email - use spam and malware filters. Be wary of attachments.
- ▶ Avoid suspicious or special offers - if it sounds too good it probably is.
- ▶ Filter what you share on social media.
- ▶ Do a Facebook privacy checkup or use whatever tools are available on your social media.
- ▶ Filter your phone calls - don't answer calls if you don't know who they are from.
- ▶ Check your credit report regularly - investigate unknown charges.

SECURITY in 2-D!

**PUT ON
YOUR 2D GLASSES**

If you've heard your colleagues, school representatives, or teachers talk about "2-D" or "2-D compliance" and think it sounds technical, here's the break-down of the basics:

"2-D" is a section of the NYS Education Law that deals with security of student data and employee data.

"Student data" is anything that can identify a student; like:

- Name, address, family members
- Student ID numbers, medical and government records
- Place and date of birth, mother's maiden name
- Anything else that can be used to identify an individual student!

Everyone in your school district (Admins, principals, teachers, staff, etc.) is required to help prevent the "unauthorized release of personally identifiable information".

Any computer program, app, information database, digital record keeping, etc, supplied by an outside company (Google, Apple, etc) must sign an agreement with each school district that they will not collect and/or share student data.

The Bottom line:

Section 2-D was created to keep student information safe and it's all of our responsibility to help keep it secure!

A QUICK LOOK AT ENCRYPTION

What a Difference an "S" makes

One of the methods that the Internet uses to increase the privacy and security of information is encryption. Encryption takes information that would normally be easily readable by humans and "scrambles" it using a random string of characters (the "key"), and then sends it across the Internet to the user. The user's then uses the key to unscramble the information so that you can read and use it.

Example of Plain text (not encrypted data) vs. Encrypted text

PLAIN TEXT PACKET (NOT ENCRYPTED)

credit card number
45678901234000
expiry data 12/25
cvv code 678

ENCRYPTED TEXT PACKET

bGiJtYrSh74GtSZj
h&iLoLmD98D13zZs
uljMd77SGgd38&\$d
yYAssaNskdSzd

More and more web sites are using encryption so that you can be sure all of the data that passes from their server to your browser can not be read by a third party trying to steal your information. You have probably noticed that a lot of addresses start with **https**: instead of **http**: - adding the "s" means that the connection is encrypted. You will also notice when you are using these sites that there is a padlock icon in the address bar.

Whenever you are submitting personal information with credit card or account numbers make sure that the site is using **https**:

WHAT IS YOUR REALITY? WHAT THINGS EFFECT HOW YOU VIEW YOUR REALITY IN 2021?

(continued from Page 1) On page 1 of this newsletter we began our article with an image created by the artist MC Escher. Escher had a very different way of looking at the world, which he illustrated in his work. We continued by asking you to think about sources of information and how they influence your view of reality.

Social media has created an entirely new profession of workers who are actually called "influencers". They make their livings by influencing you to try and buy products from various manufacturers and vendors. We also hear daily about social media platforms removing posts that are misleading, fake, or fraudulent. We are confronted by sites and sources that are labeled as "fake news". Do you allow fake news peddlers and influencers to have an effect on how you view your world?

Our news recently was taken over by disturbing events in our nation's capitol where protesters were convinced that their reality entitled them to be violent and destructive. We suggest a few sites below that may help you to make sense of what happened.

Dear
**Techie
Tom**

Dear Techie Tom:

There have been a lot of stories lately on ground hog social media about accounts being hacked.

How can I create a password that will be hard to be hacked?

Hard to Hack Phil

Dear Hard to Hack Phil,

What a great question! Try to avoid using any easy to guess information such as a pets name, your birthday, your kids names, your address or your phone number.

You may want to try using a passcode phrase to make a unique password that doesn't have any easy to access information in it.

For example: **My20catslike*s**. Or use the first letters from your phrase for example you could use the phrase: "My socks are red and blue today!" to create the password **Msarab2day!**

Another tip is to have different passwords for different type of accounts. One password might be for your school accounts, a different one for any free accounts you may create, and another unique password for any banking or high-level security accounts.

Stay safe out there!

Techie Tom

You can use the site at <http://go.gstric.org/406-test-password> to check and see how long it would take a hacker to get your password.

The Golden Rules of Chat Etiquette

Chats can be good educational tools but they also have some rules of behavior that you should abide by to be a good digital citizen.

The golden rules of chat include:

- Being respectful with the rest of classmates, teacher and all participants
- Respecting the opinions and interventions of others even if they are different than yours
- Following the rules set by the teacher for the activity that will be carried out in chat
- Using an appropriate font, with a readable size
- Not writing everything in capital letters since this is interpreted as shouting
- Checking your own grammar and spelling, as it can make reading difficult for other people
- Asking questions clearly and concisely so that they are perfectly understood by all
- Reading the contributions made previously so as not to repeat issues
- Sticking to defined themes, avoiding personal or irrelevant issues
- Using Emojis to avoid misinterpretation of text and communicate emotions is OK, but they should not be overused or abused

Six More Weeks of Winter?

Information about Emergency School Closings and Delays

Schools are closed when the weather makes it impossible to have reasonable attendance or when the schools or vehicles would not be able to operate safely. The school day is delayed when inclement weather conditions improve by early morning. Inclement weather may include snow, ice and freezing temperatures. If the school day is delayed, buses will run and schools will open two hours later than the usual time.

If it is necessary to close or delay schools, the information will be posted on the district's website at www.horseheadsdistrict.com, the district's Facebook pages, Twitter and the local television and radio stations. Horseheads schools now uses SchoolMessenger to alert you of school closings or emergencies. Opt-In from your mobile phone: Just send "Y" or "YES" to 67587.

Please be aware that the superintendent may call a remote-learning day, rather than a snow day.

Picture Me...Remotely!

Ms. Kamas, Library Clerk

I like to take pictures throughout the year of what is going on at the Middle School, so we can have an awesome end of the year slideshow in June. Believe it or not, remote learning is very challenging for teachers and staff!

I have pics of what school looks like from staff's and teachers' points of view, but I really don't know what remote learning looks like from the STUDENTS' point of view. I am looking for pictures of what remote learning looks like for YOU, if you are willing to submit pictures to me. What does your workspace look like? Do your pets join you while you're 'in school?' What do you get to have for lunch? What do you like to do for physical activity/gym class? What are you doing to have FUN? I really miss seeing your smiling faces!!!

I would love to see your pictures! You can email them to me at kkamas@horseheadsdistrict.com, and then you may see them in the end of the year slideshow.

Handwashing at Home, at Play, and Out and About

Germes are everywhere! They can get onto your hands and items you touch throughout the day. Washing hands at key times with soap and water is one of the most important steps you can take to get rid of germs and avoid spreading germs to those around you.

How can washing your hands keep you healthy?

Germes can get into the body through our eyes, nose, and mouth and make us sick. Handwashing with soap removes germs from hands and helps prevent sickness. Studies have shown that handwashing can prevent 1 in 3 diarrhea-related sicknesses and 1 in 5 respiratory infections, such as a cold or the flu.

Handwashing helps prevent infections for these reasons:

People often touch their eyes, nose, and mouth without realizing it, introducing germs into their bodies.

Germes from unwashed hands may get into foods and drinks when people prepare or consume them. Germes can grow in some types of foods or drinks and make people sick.

Germes from unwashed hands can be transferred to other objects, such as door knobs, tables, or toys, and then transferred to another person's hands.

What is the right way to wash your hands?

1. Wet your hands with clean running water (warm or cold) and apply soap.
2. Lather your hands by rubbing them together with the soap.
3. Scrub all surfaces of your hands, including the palms, backs, fingers, between your fingers, and under your nails. Keep scrubbing for at least 20 seconds. Need a timer? Hum the "Happy Birthday" song twice.
4. Rinse your hands under clean, running water.
5. Dry your hands using a clean towel or air dry them.
